The following Addendum to the tender documents is effective immediately. This Addendum shall form part of the contract documents.

All other terms and conditions remain the same.

Addendum No. 6

QUESTIONS AND ANSWERS

Q1: On drawing M2 it is mentioned to cut the existing steel sheet piles at elevation +1.0m unless noted otherwise. There is a note near Section D 2/3 on that we have to cut at the elevation +0.6m. What do we do with the existing tie rods if they are above the elevation of +0.6m, the existing tie rods are shown at elevation +1.0M.

A1: There is an error in the note on drawing M2, "Demolition Plan Showing Area of Work". It is to read "Existing SSP to be cut at Elevation 1.0m +/-".

Q2: On Drawing M2 and M3, it is written: "existing concrete surface to be removed in pieces of 2m x 6m (max) and placed in the storage area and will be used during the construction phase 2 (Typ.)" Our question is: Regarding the size of the slabs 2x6m (max), are these dimensions to be met as best as possible when the removal of the existing slab? Do we have the latitude to establish dimensions according to the max surface resulting from 12m?

A2: Slabs to be incorporated as core material in Phase 2, Rock Protection, Le Goulet. A concrete slab, 2m x 6m is the preferred for ease of handling and placement. Other sizes may be considered, but no slabs in excess of 12 square metres.
