This amendment #001 is raised to incorporate the following questions and answers that were raised during the solicitation period.

Q1. Annex A, Item 2.0 states "The X-ray source must use dual-energy X-ray transmission technology; an X-ray backscatter is mandatory."

We feel that requiring backscatter will significantly limit competition and ask that this be removed as a mandatory requirement.

A1. Delete an X-ray backscatter is mandatory.

Q2. Page 8, 6.2.4 Service – Conduct an annual inspection and calibration of the x-ray scanners. Inspection and calibration must be recorded and kept on file at the client's site for audit purposes. How many annual inspection and calibrations are required and how do we price these?

A2. At least once a year, as per Health Canada requirements. The price for the annual inspection and calibrations must be included in the price of the equipment.

Q3. Is there any disposal of old x-ray equipment required?

A3. No.

Q4. Section 6.4.1 Delivery Date, All the deliverables must be received on or before March 31, 2015. Can this date be moved to later in 2015?

A4. No

Q5. Annex A – Mandatory Specifications, 6.0 The tunnel dimensions must include a minimum tunnel opening of 25 inches wide and 20 inches high.

The industry standards for tunnel openings are 6040 – 25"W x17.25"H and 7555 – 30.7"W x 22.8"H but your request is between these two sizes which requires a larger more expensive machine to be offered. Can the tunnel size be reduced to 25"x17.25"?

A5. No.
