2. SITE VISIT NOTES

Completed walkabout exterior of building.

South Elevation Comments: Water at foundation, a small area was excavated and had drains put in, but much more needs to be done. The drains go to a catch basin.

West Elevation Comments: The 1864 large red lettering (sculptural site feature) will be staying for a few years.

North Elevation Comments: Soundings recently completed and did not note any loose stones.

East Elevation Comments: Stone pieces falling off where cramps are rusting and displacement of stones at top allows water to flow from roof.

Completed walkabout on interior of building.

Some locations of asbestos were identified, as noted in the 1996 consultant report on hazardous materials .

There is no boiler in this building, heat is provided by district heat from Confederation Centre, though there is some electric heating in the building, mainly on the second floor.

Floor and grade elevations are not aligned.

Q: When were the concrete floors in the basement poured?

A: Unknown .

Q: Are we going to upgrade the security in the building?

A: That is not part of the scope right now.

Confederation Chamber is the most important room. Review RFP for further notes on important elements.

3rd floor, 2 rooms. Commentary on interior and exterior wythes being pinned together, during 2012-13 repair project .

Q: Does the scope of work in THA report reflect what we should be doing as far as the scope.

CCC No./N° CCC - FMS No./N° VME

A: Not necessarily. The scope of the current project includes a more detailed investigation and revised recommendations on the scope of work, as part of RS 1 services.

Q: Is there drawing documentation for previous work?

A: We have as-built drawings of work done in 2013, and record drawings from the restoration work of the 1979s and 1980s .

Q: Are there any mechanical or electrical system drawings?

A: No. Very little mechanical, electrical info available.

Q: What is the scope of work of the study recently completed in attic?

A: (corrected answer based on consultation with those who completed the work) Insulation was removed to complete a mainly visual survey. Spot checks were completed for decay based on observed staining. Spot checks included pick testing and using the resistograph drill. The existing conditions, such as checking and splitting of members, were included where observed. Also, the dimensions of all major structural members were recorded where possible.

Q: Are results of the roof report available?

A: Yes, to the successful proponent.

Thermographic imaging to be done in February by PWGSC, and will be available to the successful proponent.

Province House was laser scanned – updated AutoCAD drawings, deviation model (bulge diagram) and all collected data (e.g. point cloud data) will be available to the successful proponent.

Q: The stone outside is aged. There is judgment required to decide whether it this stone should be replaced or not. Has PC and PWGSC decided how to approach this issue?

A: To be discussed with successful proponent, but we are not looking for a restoration approach.

Q: Masonry conservator – how to we price the hourly rate? Is travel to be added to this?

A: This will be clarified via addendum.

Q: Is the layout of the rooms staying the room?

A: This is to be clarified via addendum. If more funds become available, more interior work may be approved. There will be a clarification coming on the mechanical and electrical scope.

On ramp discussion – if additional budget becomes available, we will be adding more money to the construction budget. We will try to add some details on the scope.

Q: Can timeline also be clarified with this?

A: Yes, we will clarify via addendum.

Q: Emphasis is on RS1 and investigation stage. Should we assume we should have full team available at that time?

A: We will aim to clarify this in the addendum.

3. **REQUEST FOR PROPOSAL DOCUMENT**

p.18 through 23

APPENDIX C – PRICE PROPOSAL FORM to be removed and replaced by **APPENDIX C – PRICE PROPOSAL FORM REVISED** (attached)

Please note: The Price Proposal Form attached in this amendment is the Price Proposal Form that **MUST** be submitted with your proposal. Failure to comply with the requirement will result in your proposal being deemed non-responsive.

p.72

Section 3.1.1 Licensing Certification or Authorization

REMOVE “authorized” and **INSERT** in its place “licensed or eligible to be licensed”.

p.73

Section 2 Cost Specialist

REMOVE ‘...in estimating all aspects of masonry conservation work” and **INSERT** in its place “in estimating on major construction work including two (2) years of masonry conservation work”.

p. 73

SRE 3 SUBMISSION REQUIREMENTS AND EVALUATION, 3.1.2 Consultant Team Identification, SPECIALIST CONSULTANTS:

ADD the following:

“3. Window Conservator* with a minimum of ten (10) full years practicing experience. The Window Conservator’s qualifying experience must include the following types of work:

- extensive work with windows of the type at issue (i.e. significant historic wood windows with fine muntin bars, a variety of past repairs and a variety of deterioration issues);
- condition assessment, investigation and recording of wood windows;
- performance of on-site window tests, such as for air leakage;

-
- analysis and recommendation of options for repair and performance improvement (e.g. energy-related, ease of operation);
 - specification and supervision of repair of wood window sash and frames, sash cords and weights and hardware components, and production and installation of interior and exterior storm windows.

*Definition of Window Conservator: Company or individual who investigates, specifies and supervises conservation work for historic windows.

Note: Window Conservator services will be engaged at rates on an as-required basis based on the levels of effort indicated in the price proposal form Appendix C or as otherwise required or directed by the Departmental Representative.”

p.77

Section 3.3.4 Understanding of the Project

ADD at the beginning of the section:

”Notwithstanding that the project scope has yet to be defined in detail – a process to which the consultant will be contributing extensively in the early stages of the assignment, (reference section PD2 sub section 2.1.3), the proponent is asked to provide a first impression based on their experience in the conservation field of the considerations they expect to influence the project.”

Also **REMOVE** final item in list of “Information that should be provided” and replace with the following:

“- Discuss means of investigating and determining the extent of voided and bulged load bearing heavy masonry structures and considerations/methods for stabilization and repair of such voided and bulged areas, their “pros and cons”, durability etc.”

p.87

PD2 PROJECT IDENTIFICATION

ADD New Sub Section 2.1.3 Scope

“The present request for consultant proposal document reflects a project primarily relating to structural and building envelope conservation (e.g. heavy masonry and timber, slate roofing and windows) that would generally involve only incidental scope in other trades (mechanical and electrical for example) necessary to support that conservation work. Available funding may – and in time for the work to be done during the allocated period of building closure – prove sufficient to support an increase in scope to encompass more thorough scopes of conservation, code compliance and whole building systems improvements. This has not been determined, nor is there a master plan in place that would guide what that project may ultimately entail, should resources be made available. It is not anticipated that there will be a requirement for significant change in either the configuration of interior space or the accommodation standard (for example the provision of full climate control).

The intent of the “optional” services elements of the fee proposal form is to provide for the negotiation of professional fees on that scope recognizing that the services required may well be quite different as to the balance of effort between professional disciplines than those on the base scope.

The RS-1 PDSI Report will identify the full range of conservation works required for Province House and will become a guide for the phasing of a comprehensive conservation of the building.

PWGSC will separately engage a Designated Substances Consultant who will prepare designated- substances-specific contract documents, to be integrated with Construction Documents developed by Prime Consultant, for removal of designated substances. PWGSC’s appointed Designated Substances Consultant will also support the Prime Consultant with contract administration during the course of the project work.”

p. 88

PD 3 PROJECT BACKGROUND, 3.1.1 Foundations/Basement:

REMOVE “91 mm. wide” and **REPLACE WITH** “914 mm. wide”.

REMOVE “69 mm. wide” and **REPLACE WITH** “686 mm. wide”.

p. 89

PD 3 PROJECT BACKGROUND, 3.1.4 Roofs and Roofing:

ADD after first sentence, “The heavy timber framing was modified and reinforced as part of the 1970s – 1980s restoration work. The trusses were modified to transmit the loads to interior walls instead of the outer perimeter walls by adding new steel and wood framing. Joints in the trusses were reinforced with steel gusset plates.”

PD 3 PROJECT BACKGROUND, 3.3.1 Recent investigations and reports:

REMOVE in 2012 “a construction project was carried out in 2012 that involved excavating the perimeter of the building,” and **REPLACE WITH** “a construction project was carried out in 2012 that involved, for a portion of the building, excavating at the perimeter,”.

ADD in 2014-15 after “severity of decay.”, “The survey will be primarily visual; spot checks including pick testing and testing for rot using the resistograph drill will be carried out on timbers that show staining. Conditions such as checking and splitting of timbers will also be noted where observed.”

REMOVE after monitoring, “Demec stations installed by PWGSC at porticos” and **REPLACE WITH** “Demec stations installed by PWGSC at a foundation crack”.

p.93

PD 3 PROJECT BACKGROUND; 3.3.1 Recent investigations and reports

Final paragraph **ADD** “partially” before the word “excavating”.

p.95

Below final paragraph of the section **ADD** new sentence:

“PWGSC will also be commissioning an updated hazardous materials investigation and report the results of which will be provided to the consultant team.

p.99

PD 4 EXISTING DOCUMENTATION; 4.2 to be made available for the successful Proponent

ADD new item “18. Designated Substances Report, currently being commissioned, to be available to successful proponent April 28, 2015.”

p.100

PD 5 PROJECT OBJECTIVES; 5.2 Design Excellence

ADD this paragraph to the end of the section:

“Technical excellence is also essential to achieve durable repairs based on minimum levels of intervention on and causing no harm to historic fabric.”

PD 5 PROJECT OBJECTIVES; 5.3 Code Compliance

REMOVE quotation marks from “authorities having jurisdiction” and **REMOVE** “The Consultant shall identify other jurisdictions appropriate to the project.” **ADD** in its place: “The authorities on this project are the City of Charlottetown, various agencies and departments of the Province of Prince Edward Island as may apply, and the Government of Canada as represented by Public Works and Government Services Canada as the implementing department for the project and Parks Canada Agency as the federal sponsor.

The building is in provincial title and not subject to federal heritage legislation; as indicated elsewhere in this document, it is a listed heritage building or site at all three levels of government, however. For heritage policy interpretation, all interventions proposed for the building will be subject to review and or approval of Parks Canada Agency for commemorative integrity and to the Province and the City under applicable heritage legislation.”

p. 101

PD 6 CONSULTANT SERVICES:

ADD to required services, “code review services, schedule control services, window conservator services”.

p.101

PD 6 CONSULTANT SERVICES:

ADD to bulleted list:

- “Window conservator services”

p.103

PA1 PROJECT ADMINISTRATION Sub Section 1.5 Meetings

ADD the following:

“At the Project Manager’s discretion, consultant team members (other than the prime consultant’s designated lead professional who is required to attend in person) may be permitted to participate by teleconference. This permission will typically be granted when activities ongoing at the site do not involve the discipline in question.

During the design phase, the monthly meeting that falls within four weeks of a major presentation will not be held.”

p.111

RSG.9 DEFECT TRACKING

REMOVE: “A sample of...Appendix XX)”

p.113

RS 1 PRE-DESIGN SERVICES; 1.1 Intent:

REMOVE from second paragraph “required heritage conservation and structural stabilization/conservation” and **REPLACE WITH** “required heritage conservation, structural stabilization/repair, life safety code compliance and upgraded mechanical and electrical systems”.

ADD after second paragraph:

“It is anticipated that the majority of the existing mechanical and electrical services in the building will need to be removed in order to carry out repairs to the building envelope and structural systems. Existing mechanical systems are basic, with no boiler (heating is

provided mainly from an adjacent building) and limited mechanical ventilation (air handling unit for ground floor Theatre). The scope of the initial project is to include replacement of any removed mechanical and electrical services with new coordinated systems that meet current code requirements where possible in the context of heritage conservation (but not, for instance, mechanical ventilation throughout the building). Investigation and recording of existing systems can therefore be broad-based rather than detailed.

The RS 1 investigation is also to include a building code compliance review. This is to address the major life safety issues in the building, rather than identifying every detail of the building that does not comply with the current National Building Code of Canada. The outcome of this review is to contribute to the prioritization of the scope of work, and to serve as the basis for the design of life safety improvements in later phases of the project, if additional funding becomes available.”

RS 1 PRE-DESIGN SERVICES; 1.2 Scope and Activities:

ADD after “Review available existing information and reports”, “including heritage recording documents”.

REMOVE “Prepare Work Plan for building site investigation for review by Departmental Representative” and **REPLACE WITH** “Provide recommendations on scope and details of further investigation, testing, monitoring and heritage recording, for review by Departmental Representative.”

ADD after “Prepare Investigation Work Plan for building site investigations necessary for Pre-Design report for review by Departmental Representative”, “Work plan should include the following minimum information: the objective of each investigation, monitoring, testing or recording action; access requirements for each action; benefit to the project of each action; risk or consequence to the project of not conducting each action; and schedule of all investigation, monitoring, testing and recording actions.”

ADD after “Working closely with PWGSC & the construction investigation Contractor, participate in the building & site investigation”, “for instance by

documenting, measuring and recording findings through photography, sketches and other means. Monitor the results of the investigation and recommend changes to the Investigation Work Plan where required, for review by Departmental Representative.”

p. 115

ADD in fourth point of Deliverables 3. following “including related mechanical and electrical alterations” the following: “and life safety alterations”

ADD to Deliverables, “4. Heritage recording documents, for any additional heritage recording provided.” and “5. Reports on testing and monitoring results.”

p.115

RS 2 CONCEPT DESIGN, 2.1 Intent:

ADD after “technical solutions to building envelope and structural problems” the following: “and replacement of removed mechanical and electrical services,”

RS 2 CONCEPT DESIGN, 2.2 Scope and Activities:

ADD “Recommend an overall holistic approach to the repairs, demonstrating that the interconnection between problems and solutions has been considered and addressed.”

p.116

RS 2 CONCEPT DESIGN; 2.2 Scope and Activities

ADD to bottom bulleted item; “, durability and frequency of maintenance.”

RS 3 DESIGN DEVELOPMENT, 3.2.2 Details – Site Design:

ADD to list:

“Site modifications, e.g. extent of excavations, re-grading.”

RS 3 DESIGN DEVELOPMENT:

ADD:

“3.4 PRESENTATION

Present, with key members of the design team, the proposed concept design and other deliverables to the Departmental Representative and the PWGSC review committee; presentation to take place in Halifax, NS.”

RS 4 CONSTRUCTION DOCUMENTS, 4.1 INTENT:

ADD to end of first sentence, “and schedule.”

4.2 SCOPE AND ACTIVITIES; 4.2.1 General;

ADD after “technical review meetings” the words “in Halifax”.

RS 6 CONSTRUCTION AND CONTRACT ADMINISTRATION, 6.2.1 General:

REMOVE “Arrange for material testing as required in accordance as required.” and **REPLACE WITH** “Arrange for material testing as required in accordance with the specifications.”

RS 6 CONSTRUCTION AND CONTRACT ADMINISTRATION, 6.2 SCOPE AND ACTIVITIES:

REMOVE heading “6.2.4 Details – Time Extensions”

RS 6 CONSTRUCTION AND CONTRACT ADMINISTRATION, 6.3 DELIVERABLES:

REMOVE “Minutes of biweekly progress meetings” and **REPLACE WITH** “Review comments on contractor’s minutes of biweekly progress meetings”

RS 7 COMMISSIONING, 7.1 INTENT:

ADD at end of fourth point “RS 6.”

RS 7 COMMISSIONING, 7.2 SCOPE AND ACTIVITIES:

REMOVE from second sentence “building envelope and cladding system” and
REPLACE WITH “building”.

RS 7 COMMISSIONING, 7.2 SCOPE AND ACTIVITIES:

REMOVE “Development and preparation of the Building Envelope Maintenance Plan;”
and **REPLACE WITH** “Development and preparation of the Building Maintenance
Plan;”

RS 7 COMMISSIONING, 7.3.1 Project Manual:

REMOVE “Cladding systems failures and how they were addressed;” and **REPLACE
WITH** “Building element and system failures and how they were addressed;”

RS 7 COMMISSIONING, 7.3.1 Project Manual:

REMOVE “Back-up wall considerations for the cladding system;” and **REPLACE
WITH** “Considerations for the multi-wythe masonry building envelope and its inter-
connectedness with interior wall, floor and roof structures;”

RS 7 COMMISSIONING, 7.3.2 Building Envelope Maintenance Plan:

REMOVE heading “Building Envelope Maintenance Plan” and **REPLACE WITH**
“Building Maintenance Plan”.

ADD following “building envelope components” in first sentence “, structural systems,
mechanical and electrical systems etc.”

REMOVE references to “building envelope”, “Masonry/Envelope” and “envelope
system” throughout and **REPLACE WITH** “building”.

REMOVE “Cursory non-specialist cladding inspection techniques;” and **REPLACE WITH** “Cursory non-specialist building inspection techniques;”

RS 7 COMMISSIONING, 7.3.4 Submission requirements:

REMOVE numbering “7.3.4” and **REPLACE WITH** “7.3.3”.

REMOVE “Building Envelope Maintenance Plan” and **REPLACE WITH** “Building Maintenance Plan”.

p.137

AS 1 ESTIMATING AND COST PLANNING; 1.2 Scope of Services

REMOVE the word ” all” in the third paragraph and **ADD** in its place “monthly” and after the word “phases” **add** the phrase “as well as major presentation meetings,”

p.143

AS 3 RESIDENT SITE SERVICES DURING CONSTRUCTION; 3.4.1 Educational Requirements REMOVE first item from bulleted list and replace with:

- “Have a combination of a minimum of ten (10) years relevant construction trades experience and two (2) years site inspection experience or other background acceptable to the Departmental Representative;”
