This amendment 002 to the Request for Proposal is raised to answer questions from the industry.

QUESTION 2

In what type of environment will this equipment be used? Can the Crown confirm that this equipment will not be moved or serve as a mobile unit, and will not require MIL-SPEC certification?

ANSWER 2

The equipment will be integrated into an airborne system. It will be installed on various types of military platforms and equipment. The equipment will be regularly installed and uninstalled between platforms for system performance evaluations and development. Disk server MIL-SPEC certification is not mandatory.

QUESTION 3

Can the Crown amend the requirements for RAID levels 0,1,3,5,6 to include RAID functions 10,15,16,30,50,60? This would provide the Crown equipment with greater redundancy for future expansions.

ANSWER 3

RAID functions 10,15,16,30,50,60 can be included for greater functionality and future expansion, but are not mandatory.

QUESTION 4

The Crown has requested that the proposed disk array be 1U in size. In order to allow more bidders to comply, thus offering the Crown greater competition and value, will the Crown please change this requirement to 2U?

ANSWER 5

The disk array needs to be 1U in size. This unit will be used to upgrade an existing airborne system, and the available space is only 1U. 2U units will not fit mechanically and will be useless for the project.

QUESTION 6

The Crown has requested that the proposed disk array be 40lbs or less. In order to allow more bidders to comply, thus offering the Crown greater competition and value, will the Crown please change this requirement to 42lbs or less?

ANSWER 6

The disk array needs to weigh a maximum of 40 lbs. This unit will be integrated into an existing airborne system. We have a payload restriction (weight) that we need to respect.

All other terms and conditions remain unchanged.
