Questions and Answers

Question #1

Is the 50kg class spacecraft mass including bus and payload or just one of the two (i.e. assuming a 50% split between payload and bus: 25-kg payload and 25-kg bus **OR** 50-kg payload and 50-kg bus)?

Answer #1

The 50 kg class spacecraft refers to a Nanosatellite or Microsatellite class of spacecraft. There is no specific requirement in terms of bus to payload mass ratio, however the total spacecraft mass should be around 50 kg.

Question #2

Is the hosted payload mass 50-kg or ½ of 50-kg at 25-kg?

Answer #2

There is no mass requirement for the hosted payload.
