Amendment #4

1. Parts Compatibility: System to be compatible and parts interchangeable with existing 150 KW / 300 kW Magna MT Series power supplies.

Is being compatible with Magna MT a deal breaker?

Answer: For reasons of compatibility and flexibility, the 450kw power supply parts must be interchangeable with the other 150kw & 300kw Magna power supplies. It helps reduce parts inventory and reduces downtime in the event of a breakdown of one unit. Obviously, only the parts that are not capacity related will be interchangeable.

2. About the dimensions of the power unit, are the dimensions 75”Hx40”Wx52”D acceptable?

With regard to the dimensions, the dimensions as stated in the Annex “A” are the specification required due to space restrictions in the intended installation area.

3. If that compatibility is necessary, we need the source code for the control panel for MT series. Can you provided us that code?

The intent of the requirement for compatibility was for hardware, not software. There are IVI drivers available from Magna for the MT series but software compatibility is not necessary. We require only that mechanical and electrical components be compatible with the MT series.

The solicitation closing date has been extended until 03 March 2015.

All other terms and conditions remain unchanged.
