This amendment is raised to respond to the following questions received from the industry.

Question no 1:

Reference is being made to Annex A, A.5. SPECIFICATIONS, "d. PVC (polyvinyl chloride) and acid free" and "e. 100% Polypropylene" and "g. Archival/Museum quality – suitable for long term storage"

The question is that Polypropylene is "acid free," but is not generally regarded as "archival/museum quality." This is traditionally reserved for polyester.

Please confirm if you require the pouches to be made of Polypropylene or do you accept Polyester pouches for their archival quality too?

Response no 1

Polyester and PVC (polyvinyl chloride) and acid free" and "e. 100% Polypropylene" are acceptable. The goal is long term storage.

Question no 2:

Can you please kindly provide more info about the ink materials and printing materials on the certificates and the material of the certificates themselves ?

Response 2:

The goal of the material is long term storage, and though understandable that the chemistry of the inks is important. It is also important to note that this form/certificate is personalized using off the shelf laser jet printers, from HP, Xerox Lexmark and others.

All other terms and conditions remain unchanged
