This amendment is raised in order to respond to technical questions and extend the bid closing date to March 27, 2015.

Question # 1

Requirement 1.2.1 and SOW 3.1.4. Please explain how this conversion process will be taken into account in the assessment of the bid, or is it only upon delivery according to SOW 4.2.1.

Answer # 1

The conversion process will be evaluated as part of the bid evaluation to determine compliance

Question # 2

SOW 3.1.2. Is the requirement for 2 or more time overlapping (time coincident) signals or for fast pulse-by-pulse multiplexing of 2 or more signals?

Answer # 2

The signals do not have to be time coincident.

Question # 3

Annex "A", Section 3.1.2: "The RF Stimulator must have the capability to generate two or more simultaneous, but less complex emitters" – Does "simultaneous" imply support for time coincident pulses (i.e. Pulse on Pulse output) or a more standard and cost effective approach of time multiplex pulses with possible pulse drop-out?

Answer # 3

The signals do not have to be time coincident and can be multiplexed.

Question # 4

Annex "A", Section 3.1.4: Is there a document describing the content of the *. Dif files and the fields possible values?

Answer # 4

No, the document is not available.

Question # 5

The bid preparation instruction requires 2 proposal hard copies. In order to fully demonstrate the output of the AMES II translator (all emitters and all modes), we will need to submit over 1500 pages.

Can we submit a sample of one emitter and one emitter mode in the proposal hard copy and submit the balance of all the emitters and all modes on a CD?

Answer # 5

Yes. Given the large number of emitter modes to be converted a CD submission is acceptable for all the data in order to facilitate the review.

Question # 6

It is our understanding that the current stimulator (PicoAMES) communicates with other devices on the network and interfaces with existing in-house developed tools that are used to remotely control the RF Generator during UDF testing via an ethernet connection using TCP/IP. Is there a requirement for the new device to have the same capability?

Answer # 6

Yes. The contractor must provide the RF stimulator interface control document.

At Article 3.1 **Bid Preparation Instructions**

Delete: Existing Article 3.1 in its entirety

Insert: New Article 3.1 as follows:

3.1. Bid Preparation Instructions

Canada requests that bidders provide their bid in separately bound sections as follows:

Section I: **Technical Bid : two (2) hard copies or two (2) soft copies on CD**

Section II: Financial Bid : one (1) hard copy

Section III: Certifications: one (1) hard copy

Bidders must submit their financial bid in accordance with the Basis of Payment. The total amount of Applicable Taxes must be shown separately.

Prices must appear in the financial bid only. No prices must be indicated in any other section of the bid.

Canada requests that bidders follow the format instructions described below in the preparation of their bid:

- (a) use 8.5 x 11 inch (216 mm x 279 mm) paper;
- (b) use a numbering system that corresponds to the bid solicitation.

In April 2006, Canada issued a policy directing federal departments and agencies to take the necessary steps to incorporate environmental considerations into the procurement process [Policy on Green Procurement](http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html) (<http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html>). To assist Canada in reaching its objectives, bidders should:

- 1) use 8.5 x 11 inch (216 mm x 279 mm) paper containing fibre certified as originating from a sustainably-managed forest and containing minimum 30% recycled content; and
- 2) use an environmentally-preferable format including black and white printing instead of colour printing, printing double sided/duplex, using staples or clips instead of cerlox, duotangs or binders.
