TITLE: PORTABLE VEHICLE WHEEL WASH SYSTEM

Solicitation Amendment No.: 002

This amendment is raised to address the following:

- This solicitation amendment is to extend the solicitation closing date.
- Questions and Answers

1. The solicitation closing date has been extended:

FROM: 02:00 PM MST on 2015-03-09

TO: 02:00 PM MST on **2015-03-11**

If your bid has already been submitted, you may wish to revise it. Any revisions to your bid must be received by the Bid Receiving Unit on or before the time and date stated on page 1 of this document. Any revisions to your bid received after the closing date and time will be considered late and will be returned unopened.

2. QUESTIONS AND ANSWERS

Q1. Level of mud expected during the worst periods of use?

A1. During the spring, there is a high potential for soil/mud to be stuck to vehicles. The rest of the year should see much less. I don't know how to quantify how much mud will be on vehicles, but I can describe the conditions in the spring. As the snow melts and the first several inches of ground thaw, there is lots of standing water and saturated soils. It is not until the soil thaws a bit deeper that the moisture drains away. Until that deeper thaw happens, the surficial soils are extremely saturated, making for a lot of mud stuck to vehicles travelling off-road. The gravel roads would be similar, that is, quite muddy until the deeper thaw occurs.

Q2. Typical type of mud? Clay?

A2. The soils of concern are generally loam to sandy loam, there is very little clay soils to be concerned about.

Q3. Type of equipment being washes - tracked or rubber tires?

A3. The equipment will be rubber -tired (wheeled).

Q4. Cleaning expectations - mud in crack and crevices of equipment that could contain plant seeds or spores?

A4. The expectation is to remove most (95%) of the mud on the tires, wheel wells, and lower third of the vehicle.
