

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 Not applicable

1.2 WORK COVERED BY CONTRACT DOCUMENTS

- .1 The work covered by this contract includes various infrastructure, pavement and loading dock works, at the Canadian space Agency, located at 6767 Airport road, Saint-Hubert (Quebec).
- .2 The works include, **in accordance with specified work areas**, and are not limited to:

Roadway repair:

- Pulverizing pavement;
- Stabilizing subgrade ;
- Demolition of concrete curbs if required ;
- Paving;
- Pavement markings;

1.3 PARTIAL OCCUPANCY BY MASTER OF WORK

Contractor must allow:

- Access to locations surrounding the work site, for the owners staff
- The use of surrounding parking areas

1.4 EXISTING UTILITIES SERVICES

- .1 Before interrupting utility services, inform the Ministerial Representative and the utilities involved, and obtain the necessary permits.
- .2 All requests concerning interruptions of water must be submitted to Ministerial Representative at least one week before the scheduled interruption.
- .3 If taps on pipes or utilities existing connections to these pipes had to be performed, give the Ministerial Representative a 48 hours' notice before electrical or mechanical service interruption. Ensure that the duration of interruptions is as short as possible. Local authorities will set working hours. Minimizing interference with pedestrian traffic, vehicular traffic and surrounding activities is mandatory.
- .4 Provide drawings of necessary alternative routes for the movement of personnel, pedestrians and vehicles as required in section 01 35 00 Traffic regulation. Coordinate these alternatives with Ministerial Representative before implementation.
- .5 Before work begins, define the extent and location of utility lines that are in the work area and afterward inform the Ministerial Representative.
- .6 Submit to a Ministerial Representative, for approval, a schedule for the shutdown or closure of facilities or works assets, including the interruption of communication services or the power supply. Comply with the approved schedule and inform the concern parties affected by these problems.

Roadway repair

Page 2 of 2

- .7 Install a temporary bridge on site for crossing trenches, in order to maintain a normal car and pedestrian traffic.
- .8 When utility lines not listed are discovered (electrical and sewer), immediately notify the Ministerial Representative and write them down.
- .9 Protect, move or maintain utility lines that are functional. If non-functional pipes are discovered while working, remove them in a manner authorized by the competent authorities.
- .10 Contractor is responsible for protecting the electrical wires and optic fiber present on the site. He shall perform at its own expense any wire repairs on wires that we has snapped or damaged.**
- .11 Keep records for locations of all utility lines (electrical and sewer) which are maintained, moved or abandoned.
- .12 Construct barriers in accordance with Ministerial Representative requirements.

1.5 REQUIRE DOCUMENTS

- .1 Maintain on site a copy of each of the following
 - Contract Drawings
 - Tender documentation
 - Addenda
 - Reviewed shop drawings
 - List of shop drawings not reviewed
 - Change Orders
 - Other changes added to the contract
 - On site tests reports
 - Copy of the approved schedule
 - Health and safety plans and all other documents regarding security issues
 - All other indicated documents

PART 2 PRODUCTS

2.1 NOT USED

Not used.

PART 3 EXECUTION

3.1 POINT LIST

- .1 Producing a survey list.

Contractor is advised that when there is no elevation shown on drawings, he shall rebuilt the roadway at the same elevations as existing elevation. Contractor shall provide survey lists and have them approved before starting the work.
