Amendment 001

Solicitation : F3731-140201/A

Project 716213

Work Monitoring – Harbour Development – Harrington Harbour

Included in the present amendment:

1- Questions and Answers (1-3)

Question 1: Is it possible to obtain plans and specifications for the construction works ?

Answer 1: The reference for the internet site containing all required documents is given in the Request for proposals. Here it is again : <https://buyandsell.gc.ca/procurement-data/tender-notice/PW-QCM-008-16192>.

Question 2: Was a specific Contractor awarded a contract for the Works ? If so can you please tell us who it is ?

Answer 2: Information on the Contractor are available on the same internet site as the construction documents : <https://buyandsell.gc.ca/procurement-data/tender-notice/PW-QCM-008-16192>.

Question 3: In Appendix C – Price proposal form :

- a) Article 2.1.1: fees based on time. : According to the calculation of the number of hours of supervision, the contractor would work 6 days a week for eight hours a day, for a total of 48 hours per week, which would require from us a payment 8 hours overtime. From our experience of construction in remote areas, the contractor actually works 6 sometimes 7 days a week, but 10 hours a day. On a basis of 6 days. This represents a minimum of 60 hours per week or 20 hours of overtime. Since the subject hourly rate should reflect the additional time, this issue becomes very important.
- b) This raises a second question, since the construction monitoring will be ongoing, we understand that the number of paid hours in the site supervisor will be the same as the time spent by the contractor to perform the work of construction. Is our interpretation correct?
- c) Our experience in remote areas construction, we learned that both supervisors and the contractor's key personnel are working on a 21-day period and are afterwards out of the site for a period of 7 days. Since there is only one supervisor, it must be replaced by qualified personnel. Therefore, we believe that for work in remote regions there must

be on the work site a minimum of two supervisors at any time, precisely, enabling everyone to leave the site every 3 weeks. This is why we do not understand the request to provide staff support half of the time, 3 days a week. It is impossible to find external staff will only accept work 3 days a week. So the employee should be from Harrington Harbour. Mission impossible to find locally qualified staff. We therefore think the documents should reflect this particular condition for works in remote areas.

- d) Article 2.1,2: Disbursements for residential service: We believe that the first paragraph of this article was inserted by mistake. Indeed, this paragraph reads as follows:.
Disbursements at cost without markup or profit, supported by invoices / receipts. It does not apply in the case of expenses for residential services, since the subject is a lump sum amount per working day.
- e) Article 4.1 Disbursements and living expenses of the project manager. Often the client department charters a plane to site meetings, resulting often in a reduction of transport costs. Indeed, the cost of an airline ticket round trip, Québec- Harrington Harbour is in the order of \$ 3,000. Was this possibility considered by the client department?

Answer 3:

- a) There seems to be no question in this paragraph. To properly evaluate your submission and compare with other bidders, please consider the scenario that is explained by SCH in the document, and not according to what you believe to be realistic onsite. For now we must evaluate only 48 hours of work per week (8 hours of overtime).
- b) Yes, in general this is what happens, except for the case to be decided by mutual agreement between the Consultant and the Department, for example for repetitive tasks that may be partly made unmonitored.
- c) Again please remember that this is a scenario developed by the Department to compare bidders and you have to stick to what we ask. From our experience for this kind of project, we will ask one person on the site 100% of the time, which is enough half the time considering an additional person is required the other half the time (1.5 people on average). From our experience the second person can relay the first in the intense periods even with a schedule of 3 consecutive weeks.
- d) In remote areas, disbursements will be refunded upon presentation of invoices. Accepted standards for reimbursement of travel expenses are generally as follows:
<http://www.njc-cnm.gc.ca/directive/index.php?did=10&lang=eng&merge=2>
- e) DFO does not intend to charter a plane to get to work site for site meetings. Official meetings will be held by telephone or teleconference to save costs following a decision by the Department. We plan to have about 3 meetings on the site. The expenses of the Project manager will be refunded upon presentation of invoices.
