

Question and Response # 2
For RFP # 100001980
Moving and Warehousing

Q 1) Can I please get the last time you have done this requirement and how often over the past 10 years please?

R1) last time we did this contract was in 2013, and issued 5 contracts of this nature in the last 10 years.

Please fill in the requested information below on these projects so I can cost out the requirements for your request in this RFP.

Date/s:

Buildings:

Number of workstations in each Location:

Copy of Sign in Sheets with contractor at time of service/s for each location:

3.1 Moving, Dismantling and Installation Services

Pages 20 & 21

Q2) 3.1.1 The Contractor is expected to carry out three (3) large projects in three (3) different locations at the same time, requiring at least 20 installers and 10 movers, in addition to dismantling and installing as many as 100 workstations over a weekend period in each location.

R2) I think there is confusion. These projects are not defined yet. That point is meant to inform the bidder and explain to them what could potentially be required and to ensure they have enough manpower, equipment and everything else that would be required in order to deliver that amount of work at the same time.
