Amendment #008 - 31184-146874/A

The above referenced solicitation is amended as follows:

Questions and Answers

Q1. *Under Annex A- Statement of Work - Monochrome Printer #1, 2 and 3, and Form A - Substantiation of Technical Compliance Form - Line No.71, 78, and 85 - The proposed printer must have at least 6 paper trays (At least one tray available for post-process sheet insertion). With at least one tray with a capacity of greater than or equal to 2200 sheets and at least one with a capacity of greater than or equal to 1000; or, five paper trays with a total capacity of 9000 sheets and at least one tray having a maximum capacity of 2000 sheets with all trays universal up to 12 x 18 in size".*

We are unclear on what an acceptable workflow would be eliminating the necessity for a two process sheet insertion unit? For example, I would think that manually inserting front and back covers into the one insertion unit would be unacceptable as it is a very manual and time consuming exercise for the operator. Can you please explain the manual or electronic workflow that will be acceptable so we can alter our configuration accordingly?

A1. NRC's preference is for a two tray insertion but will accept a 1 tray insertion as our workflow has been readjusted.

All other terms and conditions remain unchanged.
