Please find following Addendum No. 1.

This Solicitation Amendment 002 (Addendum No. 1) is raised to incorporate responses to questions received, to amend the specifications, and to amend the drawings.

All other terms and conditions remain unchanged.

The following changes in the tender documents are effective immediately. This addendum will form part of the Contract documents.

1. Clarifications:

The following are responses to queries submitted during the tendering period:

- .1 Pleasant Camp well access doors:
Doors as shown on A602 attached will prove most unsatisfactory. IMHO fabricated access doors will be much more suitable.
- Response: Use of factory manufactured IMHO multiple leaf access doors is acceptable.
- .2 Clarify who the building and plumbing permits and fees are to be from or paid to as the Stikine is unincorporated. Ref 01 11 55 1.15.1.
- Response: Delete requirement for building and plumbing and electrical permit.
- .3 Clarify who is to engage and pay for concrete testing and compaction testing. Ref 01 75 16 para 3.7.2.1
- Response: Reference Section 01 45 00, clause 1.5.1.
- .4 Building: Section 3 on drawing A301 reads “new galvalume metal roofing and trim on existing building to match new service building” and “new cladding on existing building to match new service building” Can you please provide clarification? Are we providing new exterior finishes on the existing building to match the new building? If so, we will require the exterior elevations of the existing building.
- Response: Provide new exterior finish on existing building to match new building. Reference Appendix E – Drawings – Existing Buildings. The approximate exterior elevation of the existing maintenance building is shown on drawing titled Plans, Elevation and Detail, Drawing No. A1501-14 designed by R. Ayotte and dated 86-05-29.

2. Amend/revise the specifications as follows:

- .1 Section 01 11 55 1.15.1
Delete requirement for Building Permits.
- .2 Section 07 26 00 2.2.1 Add: ‘AirOutshield’, water resistant, breathable secondary
drainage plane/air barrier for walls manufactured by SRP Canada.

Addendum #001

Tender A – Pleasant Camp Port of Entry

2015-04-10

Pleasant Camp, British Columbia

Page 2

.3 Section 07 46 46

2.1.1

Delete reference to horizontal fiber cement panels. Replace with pre-finished, high density wood composite material lap siding and associated trim. Siding to match existing maintenance building profile and finish. Standard of Acceptance: CanExcel®

.4 Section 26 36 23

3.3.10

Replace article:

Set selector switch in "Auto" position and open normal power supply disconnect. Emergency should start, come up to rated voltage and frequency, and then load should transfer to standby. Allow to operate for emergency minutes, then close main power supply disconnect. Load should transfer back to normal power supply and 10 should shutdown.

with

Set selector switch in "Auto" position and open normal power supply disconnect. Emergency generator should start, come up to rated voltage and frequency, and then load should transfer to the emergency supply. Allow to operate on emergency power for 15 minutes, then close main power supply disconnect. Load should transfer back to normal power supply within 10 seconds (assuming normal supply voltage and frequency are within the set point ranges) should shut down after the cool-down cycle duration as recommended by the manufacturer.

3. Amend/revise the drawings as follows:

1. Drawing S-001: Change Professional Engineering Jurisdiction references on this drawing from "Yukon Territory" to "the province of British Columbia".
2. Drawing S-102, detail 1:
 - a. Revise steel rafter designation between GL A2-B/7-8: 8-W310x24 evenly spread to 5-W310x24 evenly spread as shown on attached sketch SKS-001.
 - b. Revise steel beam configuration at GL 7&8 as shown on attached sketch SKS-001.
3. Drawing S-301, section 7: Revise horizontal steel beam designation note "STEEL "HSS" BEAM B3 SEE PLAN" to read "STEEL "HSS" BEAM B6 SEE PLAN".
4. Detail 1/E203: Change wire size for OIL WATER SEPARATOR – HEAT TRACE from 2#19 CU to 2#10 CU.
