

PART 1 - GENERAL

1.1 RELATED
SECTIONS

- .1 Section 01 33 00 - Submittal Procedures.
- .2 Section 01 74 21 - Construction/Demolition
Waste Management and Disposal.
- .3 Section 03 30 00 - Cast-in-Place Concrete.

1.2 REFERENCES

- .1 American Society for Testing and Materials
International, (ASTM)
 - .1 ASTM A53/A53M-02, Specification for
Pipe, Steel, Black and Hot-Dipped,
Zinc-Coated Welded and Seamless.
 - .2 ASTM A269-02, Specification for
Seamless and Welded Austenitic Stainless
Steel Tubing for General Service.
 - .3 ASTM A307-07a, Specification for Carbon
Steel Bolts and Studs, 60,000 PSI Tensile
Strength.
 - .4 ASTM A123/A123M, Zinc (Hot Dip
Galvanized) Coatings on Iron and Steel
Products.
- .2 Canadian General Standards Board (CGSB)
 - .1 CAN/CGSB-1.40-97, Anti-corrosive
Structural Steel Alkyd Primer.
 - .2 CAN/CGSB-1.181-92, Ready-Mixed,
Organic Zinc-Rich Coating.
- .3 Canadian Standards Association (CSA
International)
 - .1 CAN/CSA-G40.20/G40.21-04, General
Requirements for Rolled or Welded Structural
Quality Steel.
 - .2 CAN/CSA-S16.1-01 (R2007), Limit States
Design of Steel Structures.
 - .3 CSA W48-06, Filler Metals and Allied
Materials for Metal Arc Welding (Developed
in co-operation with the Canadian Welding
Bureau).

.4 CSA W59-03, Welded Steel Construction
(Metal Arc Welding).

- .4 The Environmental Choice Program
 - .1 CCD-047a-98, Paints, Surface Coatings.
 - .2 CCD-048-98, Surface Coatings - Recycled Water-borne.

1.3 SUBMITTALS

- .1 Product Data:
 - .1 Submit manufacturer's printed product literature, specifications and data sheet in accordance with Section 01 33 00 - Submittal Procedures.
 - .2 Submit two copies of WHMIS MSDS - Material Safety Data Sheets in accordance with Section 01 33 00 - Submittal Procedures. Indicate VOC's:
 - .1 For finishes, coatings, primers and paints.
- .2 Shop Drawings
 - .1 Submit shop drawings in accordance with Section 01 33 00 - Submittal Procedures.
 - .2 Indicate materials, core thicknesses, finishes, connections, joints, method of anchorage, number of anchors, supports, reinforcement, details, and accessories.

1.4 QUALITY ASSURANCE

- .1 Test Reports: Certified test reports showing compliance with specified performance characteristics and physical properties.
- .2 Certificates: Product certificates signed by manufacturer certifying materials comply with specified performance characteristics and criteria and physical requirements.

1.5 DELIVERY, STORAGE, AND HANDLING

- .1 Packing, Shipping, Handling and Unloading:

.1 Deliver, store, handle and protect materials in accordance with Section 01 61 00 - Common Product Requirements.

.2 Storage and Protection:

.1 Cover exposed stainless steel surfaces with pressure sensitive heavy protection paper or apply strippable plastic coating, before shipping to job site.

.2 Leave protective covering in place until final cleaning of building. Provide instructions for removal of protective covering.

1.6 WASTE
MANAGEMENT AND
DISPOSAL

.1 Separate and recycle waste materials in accordance with Section 1 74 21 - Construction/Demolition Waste Management and Disposal.

.2 Remove from site and dispose of packaging materials at appropriate recycling facilities.

.3 Collect and separate for disposal paper, plastic, polystyrene, corrugated cardboard, packaging material in appropriate on-site for recycling in accordance with Waste Management Plan.

.4 Divert unused metal materials from landfill to metal recycling facility approved by Departmental Representative.

1.7 MEASUREMENT
FOR PAYMENT

- .1 New Pipe Wheelguard: The supply and installation of galvanized steel pipe wheelguard including steel channel seat, welding, lag screws, and all plant and labour shall be measured for payment by the lineal meter (Lm) of galvanized steel pipe acceptably installed in the work.
- .2 No separate measurement for payment shall be made for the re-installation of existing pipe wheelguard. Include all costs incidental to the unit price for new pipe wheelguard.
- .3 No separate payment shall be made for the protective posts, aluminum pedestals and all other miscellaneous metal work. Include all costs in the lump sum arrangement as noted on the bid and acceptance form.

PART 2 - PRODUCTS

2.1 MATERIALS

- .1 Steel sections and plates: to CAN/CSA-G40.20/G40.21, Grade 350W.
- .2 Steel pipe: to ASTM A53/A53M standard weight galvanized finish.
- .3 Welding materials: to CSA W59.
- .4 Welding electrodes: to CSA W48 Series.
- .5 Bolts and anchor bolts: to ASTM A307.
- .6 Grout: non-shrink, non-metallic, flowable, 35 MPa at 24 hours.
- .7 Use heavy duty sleeve anchors to performance requirements indicated on the drawings.

- .8 Steel pipes for pipe wheelguard to be welded or seamless, DN250 (273.1mm x 9.27mm) galvanized in accordance with ASTM standard A53 and CAN/CSA-S16-09 minimum yield strength 240 mpa.
- .9 Paint: Alkyd/oil resin paint similar to Pittsburg paints "Brilliant Red (Safety Red)" product FD 7-801. Paint to conform to CAN/CGSB-1.61-2004.
- .10 Aluminum sections and plates: to CSA-S157-05 Grade 6061-T6 for marine applications.
- .11 Provide galvanic washers when attaching steel bolts to aluminum surfaces.
- .12 Steel channel for pipe wheelguard assembly to be MC200X27.8, Grade 350W, galvanized to CAN/CSA-516-09.

2.2 FABRICATION

- .1 Fabricate work square, true, straight and accurate to required size, with joints closely fitted and properly secured.
- .2 Use self-tapping shake-proof flat headed screws on items requiring assembly by screws or as indicated.
- .3 Where possible, fit and shop assemble work, ready for erection.
- .4 Ensure exposed welds are continuous for length of each joint. File or grind exposed welds smooth and flush.
- .5 All welding shall be carried out in accordance with CSAW59 by a fabricator fully approved under CSA W47.1 latest edition No. 1 or No. 2.

2.3 FINISHES

- .1 Galvanizing: hot dipped galvanizing with zinc coating 600 g/m² to ASTM A123/A123m-09.
- .2 Shop coat primer: to CAN/CGSB-1.40.

2.4 SHOP PAINTING

- .1 Apply one shop coat of primer to metal items, with exception of galvanized or concrete encased items.
- .2 Use primer unadulterated, as prepared by manufacturer. Paint on dry surfaces, free from rust, scale, grease. Do not paint when temperature is lower than 7 degrees C.
- .3 Clean surfaces to be field welded; do not paint.

PART 3 - EXECUTION

3.1 ERECTION

- .1 Do welding work in accordance with CSA W59 unless specified otherwise.
- .2 Erect metalwork square, plumb, straight, and true, accurately fitted, with tight joints and intersections.
- .3 Provide suitable means of anchorage acceptable to Departmental Representative such as dowels, anchor clips, bar anchors, expansion bolts and shields, and toggles.
- .4 Exposed fastening devices to match finish and be compatible with material through which they pass.
- .5 Provide components for building by other sections in accordance with shop drawings and schedule.
- .6 Make field connections with bolts to CAN/CSA-S16.1, or weld.

- .7 Hand items over for casting into concrete or building into masonry to appropriate trades together with setting templates.
- .8 Touch-up rivets, field welds, bolts and burnt or scratched surfaces after completion of erection with primer.
- .9 Touch-up galvanized surfaces with zinc rich primer where burned by field welding.

3.2 PROTECTIVE POSTS

- .1 Install protective posts as detailed and in locations indicated on the drawings.
- .2 Use one (1) coat of exterior oil ferrous metal primer and two (2) coats of alkyd oil resin paint as specified.

3.3 PIPE WHEELGUARD
INSTALLATION

- .1 Supply and install steel pipe as detailed in minimum lengths of 5000 mm with butt joints made over wheelguard blocking.
- .2 All openings/holes will be shop cut prior to galvanizing. No field cutting is permitted.
- .3 All oval openings shall have their edges shop ground prior to galvanizing.
- .4 All steel channels shall be shop welded to the steel pipe prior to galvanizing.
- .5 Install metal work square, plumb, straight and true, accurately fitted with tight joints.
- .6 Steel pipe will be secured through steel channel wheelguard blocking and coping below with (2) 19mm diameter lag screws.
- .7 At extreme ends of pipe install end caps.

<u>3.4 ALUMINUM PEDESTALS</u>	.1	Install electrical pedestals as detailed in Division 26 - Electrical.
-----------------------------------	----	---

<u>3.5 CLEANING</u>	.1	Perform cleaning after installation to remove construction and accumulated environmental dirt.
---------------------	----	--

	.2	Upon completion of installation, remove surplus materials, rubbish, tools and equipment barriers.
--	----	---
