Question 15:

With regards to section "7.17 Protection and Security of Data Stored in Databases", what is another country that satisfies this requirement?
Our servers and DMP are located in the United States. All advertiser data is secure, encrypted and protected by firewalls.
Also, can you provide any information on 'Canada approved cryptography'?

Answer 15

No other country satisfies this requirement. Section 7.17 (under Part 7) is applicable based on the work requirements. In this case, as described in Annex "A" – Statement of Work, all data related to the Contract **must** be stored in Canada. This requirement relates to data sovereignty. The mandate doesn't include specific technical requirements with respect to firewalls and Canadian approved cryptography as data must be stored in Canada. This requirement is part of a **mandatory certification** that the bidder must provide as described in section 5.1.3.7 – Computing Infrastructure Capabilities (under Part 5). There are two aspects to this certification: data access and data storage location.
