**Solicitation Amendment No. 004 is being issued to address the following:**

- A) Amend Solicitation Amendment No. 001, Section B)**
- B) Amend Solicitation Amendment No. 003, Section A)**
- C) Questions & Answers**

-----  
**B) At Solicitation Amendment No. 001, Section B)**

Delete: Environment Canada will commit to a minimum order size of 50 sensors for each optional quantities order.

Insert:

1. Environment Canada will commit to a minimum order size of 35 sensors for each optional quantities order (i.e., zero to two batches) for Contract Year 1.
2. Environment Canada will commit to a minimum order size of 35 sensors for each optional quantities order (i.e., zero to two batches) for Contract Year 2.
3. Environment Canada will commit to a minimum order size of 35 sensors for each optional quantities order (i.e., zero to two batches) for Contract Year 3.
4. Environment Canada will commit to a minimum order size of 50 sensors for each optional quantities order (i.e., zero to two batches) for Contract Years 4 to 10.

-----  
**B) At Solicitation Amendment No. 003, Section A)**

Delete in its entirety;

Insert:

A4: For year 1, Environment Canada requires two batches, as stipulated in Part 6, Section 3.2 Delivery Date, for firm quantities. For optional quantities, Environment Canada will commit to a minimum order size of 35 sensors (i.e., zero to two batches).

For years 2 to 3, Environment Canada will commit to a single order size of 70 sensors for fixed quantities (i.e., one batch), and a minimum order size of 35 sensors for optional quantities (i.e., zero to two batches).

For years 4-10, Environment Canada will commit to a minimum order size of 50 sensors for optional quantities (i.e., zero to two batches).

-----  
**C) Questions & Answers**

**Q1:** Sorry for this email, but in the most recent amendment, 003, the optional quantities were changed as follows:

A4: For year 1, Environment Canada requires two batches, as stipulated in Part 6, Section 3.2 Delivery Date, for firm quantities. For optional quantities, Environment Canada will commit to a minimum order size of 50 sensors (i.e., zero to two batches).

---

For years 2 to 3, Environment Canada will commit to a single order size of 70 sensors for fixed quantities (i.e., one batch), and a minimum order size of 50 sensors for optional quantities (i.e., zero to two batches).

For years 4-10, Environment Canada will commit to a minimum order size of 50 sensors for optional quantities (i.e., zero to two batches).

Minimum optional order sizes of 50 each "(i.e., zero to two batches)" yields maximum annual optional volumes of up to 100 units. This inconsistent with Annex B – Basis of Payment that lists "Up to 70 ea" optional quantities for years one through three. Shouldn't Annex B be changed to reflect the larger optional orders sizes for years one through three? Years four through ten are consistent with the above correction.

**A1:** Please reference Section B) above.

-----  
**ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME**
