This Amendment 003 (Addendum 002) is raised to provide responses to questions from bidders.

**The following changes/clarifications in the tender documents are effective immediately.
This addendum will form part of the contract documents**

Responses to Questions from Bidders

- Q1) What is the design Q = CMS?
- A1) The design Q varies in each channel / ditch from 0.3 m³/s to 19.2 m³/s

- Q2) What is the Year Design Storm = 50 year or 100 year?
- A2) The design return period varies with the size of the culvert and size of the drainage area. Culverts equal to or larger than 3000 mm in diameter use a 200 year return flow event, culverts less than 3000 mm in diameter use a 100 year return flow event or a 10 year return flow event should the drainage area be less than 1 Ha.

- Q3) Channel Velocity?
- A3) There are several channels on the project and velocities vary. We anticipate velocities up to 2.7 m/s in some channels during a 200 year storm event.

- Q4) What is the Slope Gradient? – Slope gradients vary –
- A4) See the contract drawings.

- Q5) What is the Depth of Flow?
- A5) The depth of flow in each channel / ditch varies. A hydrology and hydraulic assessment for each channel / ditch would be required.

- Q6) What are the depths of the channels/ditches?
- A6) The depths of the channels / ditches varies, see the contract drawings.

- Q7) What are the channel/ditch side slopes 2:1 or 3:1 etc?
- A7) The channel / ditch side slopes varies from 2H:1V – 4H:1V ; see the contract drawings.

- Q8) Channel/ditch widths?
- A8) Channel widths vary. The typical ditch is 4 m wide but the width varies in some locations, see the contract drawings for additional details.

- Q9) Channel/ditch lengths?
- A9) See the contract drawings.

All other terms and conditions remain unchanged.
