

**PRODUCT  
DESCRIPTION**

A waterbased, biodegradable alkaline cleaner recommended to remove oil, grease and other contaminants prior to further surface preparation, or for general cleaning purposes.

**INTENDED USES**

As a highly effective detergent for interior and exterior surfaces and other areas of contamination.

**PRODUCT  
INFORMATION**

<b>Colour</b>	GMA571-Clear
<b>Converter/Curing Agent</b>	One pack
<b>Mix Ratio</b>	Not applicable
<b>Method of Application</b>	Brush, Airless Spray

**Drying Information**

**Overcoating Data - see limitations**

**Substrate Temperature**

Overcoated By	Min	Max	Min	Max	Min	Max	Min	Max
---------------	-----	-----	-----	-----	-----	-----	-----	-----

**Note:**Drying and Overcoating Information are not applicable for this product.

SYSTEMS AND  
COMPATIBILITY

---

SURFACE  
PREPARATIONS

## APPLICATION

May be used as supplied if contamination is particularly heavy, otherwise follow dilution recommendations specified in "Mixing" section. Apply International 950 Cleaner to substrate to be cleaned and allow to soak for 3-5 minutes. Rinse away with ample amounts of fresh water, ensuring all deposits are removed, so that adhesion of coatings to be applied is not affected.

## Mixing

International 950 Cleaner is supplied in concentrated form, but is normally diluted with fresh water prior to application. (Dilution ratios may vary depending on severity of the substrate contamination).  
Dilution Ratios:

Brush-on/Wipe 1 part International 950 Cleaner to 5-10 parts fresh water.

High Pressure Spray 1 part International 950 Cleaner to 10-20 parts fresh water.

## Work Stoppages and Cleanup

Flush all equipment with clean water. Unused, diluted International 950 Cleaner can be returned to its original container for future use, or it should be immediately disposed of in a safe manner recommended for alkaline materials.

## SAFETY

All work involving the application and use of this product should be performed in compliance with all relevant national Health, Safety & Environmental standards and regulations. Prior to use, obtain, consult and follow the Material Safety Data Sheet for this product concerning health and safety information. Read and follow all precautionary notices on the Material Safety Data Sheet and container labels. If you do not fully understand these warnings and instructions or if you can not strictly comply with them, do not use this product. Proper ventilation and protective measures must be provided during application and drying to keep solvent vapour concentrations within safe limits and to protect against toxic or oxygen deficient hazards. Take precautions to avoid skin and eye contact (ie. gloves, goggles, face masks, barrier creams etc.) Actual safety measures are dependant on application methods and work environment.

### EMERGENCY CONTACT NUMBERS:

USA/Canada - Medical Advisory Number 1-800-854-6813

Europe - Contact (44) 191 4696111. For advice to Doctors & Hospitals only contact (44) 207 6359191

R.O.W. - Contact Regional Office (see page 4 of Data Sheet)

### LIMITATIONS

Apply in good weather when air and surface temperatures are above 35°F (2°C).  
Unmixed material (in closed containers) should be maintained in protected storage between 40 and 100°F (4-38°C).  
Keep from freezing and do not apply under freezing conditions.  
Maximum substrate application temperature is 135°F (57°C). Do not apply material over hot surfaces, as it may cause lifting of some coatings, such as alkyd based coatings due to alkaline (pH approximately 13) nature of International International 950 Cleaner.

Only use spray equipment designed for use with highly alkaline products.

Technical and application data herein is for the purpose of establishing a general guideline of the coating and proper coating application procedures. Test performance results were obtained in a controlled laboratory environment and International makes no claim that the exhibited published test results, or any other tests, accurately represent results actually found in all field environments. As application, environmental and design factors can vary significantly, due care should be exercised in the selection, verification of performance and use of the coating.

<b>UNIT SIZE</b>	1 Gallon Unit (3.79 l) 5 Gallon Unit (18.93 l) <i>This product can be made available in other pack sizes. Consult International for details.</i>
<b>UNIT SHIPPING WEIGHT</b>	1 Gallon Unit : 9.8 lbs (4.4 kg) 5 Gallon Unit : 46 lbs (20.9 kg)
<b>UN SHIPPING NO.</b>	1263
<b>STORAGE</b>	Shelf Life 24 months minimum from date of manufacture when maintained in protected storage at 40-100°F (4-38°C). Subject to reinspection thereafter. Store in dry, shaded conditions away from sources of heat and ignition.
<b>WORLDWIDE AVAILABILITY</b>	Consult International.

### DISCLAIMER

*The information in this data sheet is not intended to be exhaustive: any person using the product for any purpose other than that specifically recommended in this data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. All advice we give or statements made about the product (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing to do so, we do not accept any liability at all for the performance of the product or for (subject to law) any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is liable to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to check that this data sheet is current prior to using the product. It is the user's responsibility to check with his local International representative that this data sheet is current prior to using the product.*
