GENERAL INFORMATION

1.0 PROJECT SUMMARY

AAFC is requesting proposals for the conduct of chemical analysis for pesticide residues on crop samples collected from field trials at several Canadian locations, in accordance with the requirements of the Organization for Economic Co-operation and Development (OECD) Principles of Good Laboratory Practices (GLP) (rev 1997), study plans (Appendix B – Annex 10), and Health Canada's Pest Management Regulatory Agency regulatory directive, DIR98-02 "Residue Chemistry Guidelines" (available at <http://www.pmr-arla.gc.ca/english/pdf/dir/dir9802a-e.pdf>).

All bids must be in Canadian dollars. Evaluations for cost per point are calculated on the total cost of the project, excluding GST or HST (if applicable). Only the Canadian currency value for the bid will be used in evaluating a proposal. The Canadian currency value for a bid is fixed at the time of the proposal, irrespective of future changes in currency rate.

GST /HST (if applicable) can only be collected if your company has a GST/HST registration number. For further information please contact Canada Revenue Agency at:

<http://www.ccr-aadrc.gc.ca/sitemap-e.html#tax>.

The failure by US companies to bid in Canadian dollars (a mandatory requirement of the solicitation) is sufficient to make its proposal non-compliant. AAFC will reject a US company's bid made in any currency other than Canadian.

If the Bidder is a sole proprietorship, a partnership or a corporate body, the Bidder should provide a statement indicating the laws under which it is registered or incorporated together with the registered or corporate name and place of business and the country where the controlling interest/ownership of the organization is located as per Appendix E of this RFP.

2.0 ACCEPTANCE OF TERMS AND CONDITIONS

- 2.1 Agriculture and Agri-Food Canada will only consider Proposals which accept Agriculture and Agri-Food Canada's terms and conditions.
- 2.2 The General Conditions attached in Appendix A and those set out in Part 3 of this RFP shall form part of any Resulting Contract.

3.0 INCURRING COST

- 3.1 The cost to prepare the Proposal will not be reimbursed by Agriculture and Agri-Food Canada.
- 3.2 No cost incurred before receipt of a signed Contract or specified written authorization from the Contracting Authority can be charged to any Resulting Contract.

4.0 ENQUIRIES - SOLICITATION STAGE

- 4.1 All enquiries or issues concerning this solicitation must be submitted in writing to the Contracting Authority named on the cover page of the RFP. It is the responsibility of the Bidder to obtain clarification of the requirements contained herein, if necessary prior to submitting a proposal.
- 4.2 Enquiries and issues must be received by the Contracting Authority no later than ten (**10**) calendar days prior to the solicitation closing date specified herein to allow sufficient time to provide a response. Enquiries or issues received after that time may not be able to be answered prior to the solicitation closing date.

- 4.4 All enquiries and other communications with government officials throughout the solicitation period are to be directed **ONLY** to the Contracting Authority named below. Noncompliance with this condition during the proposal solicitation period may (for that reason alone) result in disqualification of a Proposal.

- 4.6 Bidders shall not place any conditions or make any assumptions that attempt to limit or otherwise modify the scope of Work pursuant to the Statement of Work (Appendix B)

5.0 RIGHTS OF CANADA

- 5.1 Canada reserves the right to:
1. Accept any Proposal in whole or in part, without prior negotiation;
 2. Reject any or all Proposals received in response to this RFP;
 3. Cancel and/or re-issue this RFP at any time;
 4. Ask the Bidder to substantiate any claim made in the Proposal;
 5. Enter into negotiations with one or more Bidders on any or all aspects of their Proposals;
 6. Award one or more Contracts;
 7. Retain all Proposals submitted in response to this RFP.

6.0 SUBSTANTIATION OF PROFESSIONAL SERVICES RATES

- 6.1 In Canada's experience, bidders will from time to time propose prices at the time of bidding that they later refuse to honour, on the basis that these prices do not allow them to recover their own costs and/or make a profit. When evaluating the prices for professional services bid, Canada may, but will have no obligation to, require price support for any prices proposed. Examples of price support that Canada would consider satisfactory include:
1. documentation (such as billing records) that shows that the Bidder has recently provided and invoiced another customer (with whom the Bidder deals at arm's length) for services similar to the services that would be provided under a resulting contract, and the fees charged are equal to or less than the price offered to Canada (to protect the privacy of the customer, the Bidder may black out the customer's name and personal information on the invoice submitted to Canada);
 2. a signed contract between the Bidder and an individual qualified (based on the qualifications described in this bid solicitation) to provide services under a resulting contract where the amount payable under that contract by the Bidder to the resource is equal to or less than the price bid;
 3. a signed contract with a subcontractor who will perform the work under any resulting contract, which provides that the required services will be provided at a price that is equal to or less than the price bid; or
 4. details regarding the salary paid to and benefits provided to the individuals employed by the Bidder to provide services, where the amount of compensation, when converted to a per diem or hourly rate (as applicable), is equal to or less than the rate bid for that resource category.

Once Canada requests substantiation of the prices bid, it is the sole responsibility of the Bidder to submit information (either the information described in the examples above, or other information that demonstrates that it will be able to

recover its own costs based on the prices it has proposed) that will allow Canada to determine whether it can rely, with confidence, on the Bidder's ability to provide the required services at the prices bid, while, at a minimum, recovering its own costs. Where Canada determines that the information provided by the Bidder does not demonstrate the Bidder's ability to recover its own costs in providing the prices bid, Canada may, at their sole discretion declare the bid non-compliant.

7.0 MANDATORY CLAUSES

- 7.1 Where the words “**must**”, “**shall**” or “**will**” appear in this RFP, the clause is to be considered as a mandatory requirement.

8.0 DEBRIEFING

- 8.1 After contract award, bidders may request a debriefing on the results of the bid solicitation process. Bidders should make the request to the Contracting Authority within the timeframe specified in the contract award notice. The debriefing may be in writing, by telephone or in person at the discretion of the Contracting Authority.

9.0 OFFICE OF THE PROCUREMENT OMBUDSMAN

If you have issues or concerns regarding the solicitation, you have the option of raising them with the department or with the Office of the Procurement Ombudsman (OPO). The Office of the Procurement Ombudsman was established by the Government of Canada to provide an independent avenue for suppliers to raise complaints regarding the award of contracts under \$25,000 for goods and under \$100,000 for services. You have the option of raising issues or concerns regarding the solicitation, or the award resulting from it, with the OPO by contacting them by telephone at 1-866-734-5169 or by e-mail at boa.opo@boa.opo.gc.ca. If no change is made, the bidder acknowledges the applicable law specified is acceptable to the Bidder.

2.0 SUBMISSION OF PROPOSAL

- 2.1 Proposals must be submitted in hard copy as described in Article 3.0.

Due to the nature of this RFP electronic transmission of proposal by such means as electronic mail or facsimile to the Department of Agriculture and Agri-Food is not considered to be practical and therefore will not be accepted.

In order to be awarded a contract, the certifications attached **in Appendix “E”** will be required. The certifications should be submitted with the proposal. Canada may declare a bid non-responsive if the certifications are not submitted or completed as required. Where Canada intends to reject a proposal pursuant to this paragraph, the Contracting Authority will so inform the Bidder and provide the Bidder with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within that time frame period will render the proposal non-responsive.

Compliance with the certifications the Bidder provides to Canada is subject to verification by Canada. The Contracting Authority shall have the right to ask for additional information to verify that the Bidder is compliant with the applicable certifications before and after award of a contract. Any certification made by the Bidder that is determined to be untrue, whether made knowingly or unknowingly, or any failure to comply with the certifications or comply with the request of the Contracting Authority for additional information, will render the bid non-responsive.

- (b) It has the necessary qualifications, including knowledge, skill and experience, to perform the Work, together with the ability to use those qualifications effectively for that purpose; and
- (c) It has the necessary personnel and resources to perform the Work.

4.2 Except for government property specifically provided for in the Contract, the Contractor shall supply everything necessary for the performance of the Work, including all the resources, facilities, labor and supervision, management, services, equipment, materials, drawings, technical data, technical assistance, engineering services, inspection and quality assurance procedures, and planning necessary to perform the Work.

GC5. Inspection and Acceptance

5.1 The Work will be subject to inspection by Canada. Should any part of the Work whether it be a report, document, good or service not be in accordance with the Contract or not be done to the satisfaction of the Canada, as submitted, Canada will have the right to reject it or require its correction at the sole expense of the Contractor before making payment.

5.2 The Contractor will be in default of the Contract if the Work is rejected by Canada or if he fails to correct the Work within a reasonable delay.

GC6. Amendments and Waivers

6.1 No design change, modification to the Work, or amendment to the Contract shall be binding unless it is incorporated into the Contract by written amendment or design change memorandum executed by the authorized representatives of Canada and of the Contractor.

6.4 The waiver by a Party of a breach of any term or condition of the Contract shall not prevent the enforcement of that term or condition by that Party in the case of a subsequent breach, and shall not be deemed or construed to be a waiver of any subsequent breach.

GC7. Time of the Essence

8.2 The Contractor shall give notice to the Minister immediately after the occurrence of the event that causes the excusable delay. The notice shall state the cause and circumstances of the delay and indicate the portion of the Work affected by the delay. When requested to do so by the Minister, the Contractor shall deliver a description, in a form satisfactory to the Minister, of work-around plans including alternative sources and any other means that the Contractor will utilize to overcome the delay and Endeavour to prevent any further delay. Upon approval in writing by the Minister of the work-around plans, the Contractor shall implement the work around plans and use all reasonable means to recover any time lost as a result of the excusable delay.

8.3 Unless the Contractor complies with the notice requirements set forth in the Contract, any delay that might have constituted an excusable delay shall be deemed not to be an excusable delay.

8.4 If an excusable delay has continued for thirty (30) days or more, Canada may, by giving notice in writing to the Contractor, terminate the Contract. In such a case, the Parties agree that neither will make any claim against the other for damages, costs, expected profits or any other loss arising out of the termination or the event that contributed to the excusable delay. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

8.5 Unless Canada has caused the delay by failing to meet an obligation under the Contract, Canada will not be responsible for any cost incurred by the contractor or any subcontractors or agents as a result of an excusable delay.

8.6 If the Contract is terminated under this section, Canada may require the Contractor to deliver to Canada, in the manner and to the extent directed by Canada, any completed parts of the Work not delivered and accepted before the

termination and anything that the Contractor has acquired or produced specifically to perform the Contract. Canada will pay the Contractor:

- (a) The value, of all completed parts of the Work delivered to and accepted by Canada, based on the Contract price, including the proportionate part of the Contractor's profit or fee included in the Contract price; and
- (b) The cost to the Contractor that Canada considers reasonable in respect of anything else delivered to and accepted by Canada.

8.7 The total amount paid by Canada under the Contract to the date of termination and any amounts payable under this subsection must not exceed the Contract price.

APPENDIX “B”

STATEMENT OF WORK

BACKGROUND:

AAFC is requesting proposals for the conduct of chemical analysis for pesticide residues on crop samples collected from field trials at several Canadian locations, in accordance with the requirements of the Organization for Economic Co-operation and Development (OECD) Principles of Good Laboratory Practices (GLP) (rev 1997), study plans (Appendix B – Annex 11), and Health Canada’s Pest Management Regulatory Agency regulatory directive, DIR98-02 “Residue Chemistry Guidelines” (<http://www.pmr-arla.gc.ca/english/pdf/dir/dir9802a-e.pdf>).

Only the analytical methods in the list of projects in Annex 1 of this Appendix can be used. The methods are provided in PDF files Appendix B – Annexes 2-10 attached to this RFP except for:

- **Project 3: Residue Method Validation for the Determination of Florasulam in Agricultural Commodities.** Method belonging to Dow AgroSciences, which must be ordered from **Janisse Routledge (Tel: 403-735-8823); email: jroutledge@dow.com**
- **Project 5: Validation of an Analytical Method for the Determination of Propyzamide in Crops.** Method belonging to Dow AgroSciences, which must be ordered from **Janisse Routledge (Tel: 403-735-8823); email: jroutledge@dow.com**
- **Project 6: Method Validation for the Determination of Residues of Chlorpyrifos and Chlorpyrifos-Methyl in Agricultural Commodities by Liquid Chromatography with Tandem Mass Spectrometry.** Method belonging to Dow AgroSciences, which must be ordered from **Janisse Routledge (Tel: 403-735-8823); email: jroutledge@dow.com**
- **Project 11: Determination of Residues of Spinosad in Agricultural Crops With High Aqueous Content by High Performance Liquid Chromatography with +APCI Mass Spectrometry Detection.** Method belonging to Dow AgroSciences, which must be ordered from **Janisse Routledge (Tel: 403-735-8823); email: jroutledge@dow.com**

Frozen samples will be shipped to the successful bidder(s) (laboratory) upon harvest from ongoing field trials. Anticipated harvest dates are indicated on the List of Projects (Appendix B, Annex 1). The exact shipping dates will be determined after the contract is awarded. Storage stability data will be required if, at the time of analysis, samples have been stored longer than the storage stability timeframe indicated on the List of Projects. With the exception of modifications necessary to adapt the methods to different crop fractions, AAFC expects the methods to be followed as written. This applies specifically to the equipment (detector) used to determine the residue definition. If, however, upon review of the method provided, the bidder believes that a different detector can be used, a rationale for the modification must be clearly indicated in the proposal and all impacts or changes in the procedures on the reference method indicated. Upon awarding contracts, all modifications (if approved) will be incorporated into the analytical portion of the study plan.

For the purpose of preparing proposals, it is not a requirement to bid on all Projects. Proposals must be **submitted on the basis of project number** and not by study number. A project consists of all the respective studies specific to a given project number, the active ingredient, the commercial product, the crop(s), the number of trials conducted and the number of samples per trial (treated and untreated). The list of projects for which proposals are being sought is included in Annex 1 of this Statement of Work. The Residue Analysis Application Form (Appendix D – Annexes 1- 11) must be completed for each project for which a bid is being made.

Bidders must also complete Appendix B Annex 11 with proposed time frames for the completion of sample analysis.

As field trials are subject to the forces of nature throughout the growing season and possible changes in regulatory requirements, there is a possibility in either the cancellation of trials or a reduction in the number of samples required for residue analysis. This may result in the need to amend this RFP or to adjust contracts to reflect changes.

Bids must be in Canadian dollars. Evaluations for cost per point are calculated on the total cost of the individual project, excluding HST.

HST can only be collected if your company has a HST registration number. For further information please contact Canada Revenue Agency at:

<http://www.cra-adrc.gc.ca/sitemap-e.html#tax>.

The failure to provide bids in Canadian dollars will make the proposal non-compliant. AAFC will reject any bid not in Canadian currency.

It is expected that AAFC will have to contract with several different companies to complete the identified laboratory analysis for the specified projects. However, the degree of work that will be contracted is dependent upon many factors, including the response level to this RFP.

NOTE: Appendix B, Annex 1 contains the list of projects detailing the sample type, number of samples, the methods, and residues of concern.
Annexes 2 - 9 - Analytical Methods
Annex 10 - Draft Study Plan Amendment

- Contractors must review study plan, analytical methodology and follow the study plan.
- Contractors must follow their Standard Operating Procedures (SOPs). Any deviation to SOPs related to a study plan must be documented, signed by the principal investigator and test site management, and sent to the study director for approval.
- Contractors must provide a copy (electronic or printed) of their SOPs to the project authority. For returning contractors only those SOPs that have been reviewed since the last contract with AAFC need to be provided.
- Contractors must ensure qualified quality assurance personnel oversee GLP compliance.
- Contractors must provide a copy of the facility master schedule.
- Contractors must notify study directors when crop samples have been delivered by an authorized carrier.
- Contractors must store crop samples in accordance with the study plan and facility SOPs.
- Contractors must adapt/validate the analytical method as per study plan.
- Contractors must accurately record and verify all laboratory data and ensure the final analytical report as described in section 33 of the study plan accurately reflects all raw data when submitted to the study director.
- Contractors must submit all original raw data, as per study plan, to the study director unless otherwise specified by the study director.
- It may be necessary to retain a sample of the reference standard. This will be determined by the study director after the contracts have been awarded.
- Contractors must ensure that method validation and sample analyses are completed in a timely manner following receipt of samples in order to avoid requirement for freezer storage stability analysis and respect completion of analysis as per proposal. (No later than six months from receipt of the final field sample and appropriate reference standards, unless approved by the study director or project authority).
- Contractors must ensure the steps are taken to address storage stability needs. This includes preparing samples upon arrival for storage stability analysis.
- The completed final analytical report and raw data for each study must be submitted to AAFC no later than six months from receipt of the final field sample and appropriate reference standards, unless approved by the study director or project authority.

The analytical phase portion of each study plan will include the following laboratory analysis requirements:

A) Reference method modification (if required)

Contractors must use methods listed in Appendix B, Annex 1. If modifications are necessary due to test matrix interferences, these must be documented and approved by the study director prior to samples analysis.

B) Method validation

1. To be done for **each Residue Definition on each crop fraction.**
2. The method may be validated prior to receipt of the field samples using store purchased (preferably organic) crop fraction. Documentation of the purchase date and the supply source is required.
3. To validate the method, analyze one control sample, and three fortified replicates, at each of three levels of fortification. The three levels will be: the limit of quantitation (LOQ), 2X LOQ and 10X LOQ (or as specified in the study plan). The minimum number of validation samples will be 10.

C) Sample analysis

1. A solvent blank must be run with each set during the course of the analysis.
2. Adequate concurrent recovery samples that bracket the actual residues must be analysed.
3. The concurrent recovery is conducted with sample analysis and is separate from the method validations.

D) Storage stability analysis

1. The schedule for storage stability analysis must include a 0-day, 30 days and **every 90 days thereafter** until the length of the longest sample storage period, unless otherwise indicated by the study director in the study plan. Upon validation of the method and approval by study director, for each crop fraction, a minimum of three replicates per time frame are to be fortified at 10X LOQ and put in frozen storage. Three samples of each analyte per crop fraction will be analyzed after the appropriate storage period. One control sample and three freshly fortified controls will also be included at each time frame.
2. To avoid delays in storage stability data generation, contractors must provide a schedule listing the steps taken to conduct the storage stability analysis when this data are required.

NOTE: All projects must follow the study plan and meet the appropriate policies and data requirements of the Health Canada's Pest Management Regulatory Agency (PMRA) with respect to residue chemistry as noted in Section 1.0.

Qualifications:

Provide proof of current GLP recognition: a current copy of the GLP certificate issued by the Standards Council of Canada (SCC). SCC is the organization responsible for accrediting Canadian laboratories to OECD, GLP standards. U.S. laboratories are governed by the Environmental Protection Agency (EPA) GLP regulations. There is a memorandum of understanding (MOU) regarding GLP acceptability, between PMRA in Canada and the EPA in the U.S. Hence, in place of SCC accreditation, proposals will be accepted from laboratories operating in the United States, if they provide a copy of their most recent facility inspection report conducted by the EPA (if available), and the most recent independent quality assurance auditor report for a critical phase and of a final report.

Acceptance of the above information, by Agriculture and Agri-Food Canada (AAFC) is conditional upon its review and assessment of these documents in meeting the requirements of Appendix "E", Section 1.2 and including the following:

- Confirm that QA services are in place.
- Provide a minimum of one reference, preferably two, from a client(s) for whom a GLP compliant crop residue laboratory analysis study was completed in the last two years.
- Supply an organizational chart including CVs and certifications of all relevant employees and sub-contractors, including QA personnel.
- Document previous pesticide residue analysis experience for each project bid with respect to the active ingredient and/or the sample matrix.
- Provide an equipment listing and laboratory layout.
- Describe in terms of instrumentation and labour, how the proposed bid(s) will result in completed final analytical report(s) within the timelines listed in Section 5 below.
- Provide a copy of the facility master schedule.

DELIVERABLES AND SCHEDULE:

- Laboratory Study tracking form (submitted prior to project initiation) including the schedule of analysis with time frames proposed for method validation, completion of sample analysis, submission of raw data, and

submission of draft, and final analytical reports. Work plans should include measures taken to conduct freezer storage stability analyses concomitant to sample analysis to avoid delays in the completion of the final analytical report;

- Copy of SOPs (printed or electronic pdf) - for contractors that have already submitted SOPs to AAFC, only updates are required;
- Copy of the facility master schedule (confidential information may be blacked out);
- Detailed validated working method for approval by study director prior to starting sample analysis;
- Results of method validation prior to sample analysis initiation;
- Summary of analytical results, submitted after final sample analysis;
- QA reports for in-process inspection, review of raw data, and final analytical report, to be forwarded to AAFC within two weeks of each QA inspection being completed;
- Completed final analytical report for each study with all data is to be submitted to AAFC no later than six (6) months after receipt of the final field samples and appropriate reference standards, unless otherwise approved by the Study Director and Project Authority;
- Final analytical reports are to be submitted on the basis of study number and **not** by project number;
- Delays in the delivery of the raw data and final analytical report (as per approved work plan) must be justified and approved by the study director. If acceptable justification is not provided a 10% decrease on the remaining contract balance will be applied for each month delay.

General Information:

- The list of projects is attached (**Appendix B, Annex 1**)
- For each project, quotations should detail the activities and deliverables to be supplied, including modification of method (if needed), method validation, storage stability study, analysis of samples, Quality Assurance (QA) audit (in-process, raw data, final analytical report) reports and other costs, if any, such as archiving of data, long-term storage of samples, and a total cost for completing the requested statement of work.
- Note: a separate report is required for each active ingredient and crop combination i.e. a report for each study number.

- For additional information, please contact the Contracting Authority.

DURATION/PERIOD OF CONTRACT:

The contract period will start at the signing of the contract and continue until the date of completion of all projects as stipulated by the bidder in the work plan /progress report (Appendix B – Annex 11) with specific durations established for each study but may be extended at the discretion of the Project Authority if required. In most cases the crop samples will be harvested between May and December 2015. A comment is listed on Appendix B, Annex 1 for all projects including trials conducted in 2016.

CONSTRAINT:

Field trials are subject to the forces of nature throughout the growing season and possible changes in regulatory requirements. This may result in either the cancellation of trials or a reduction/elimination in the number of samples required for residue analysis. Additionally, some storage stability data may not be required due to availability of new information, timing of analysis or changes in regulatory requirements. There may be a need to reduce the number of samples analyzed if analysis of the decline samples is not required. Consequently, this RFP may be amended or some chemical analysis contracts may need to be adjusted after being issued.

EVALUATION PROCEDURES & CRITERIA

TECHNICAL PROPOSAL

It is essential that the elements contained in the Proposal be stated in a clear manner and in sufficient depth to allow for evaluation by the evaluation team.

1.0 METHOD OF SELECTION – HIGHEST COMBINED SCORE OF TECHNICAL MERIT AND PRICE

- 1.1 The evaluation process is designed to identify the most qualified contractor to provide services as stipulated in the Statement of Work (Appendix B).
- 1.2 This section comprises the detailed Proposal requirements that will be used to evaluate Bidders' responses to the RFP.
- 1.3 The mandatory requirements under section 2.0 will be evaluated on a compliant/non-compliant basis. The Proposals must include the necessary documentation to demonstrate this compliance.
- 1.4 The selection of the responsive Proposal will be made on the basis of the **HIGHEST COMBINED SCORE** for both the technical and financial proposals. The combined scores will be determined by adding the technical and financial points obtained.

The Bidders' Technical and Financial proposals will be scored separately. An Overall Proposal Score will be determined by combining a Bidder's Technical Proposal Score and Financial Proposal Score in accordance with the following weights:

Technical Proposal = 90%

Financial Proposal = 10%

Overall Proposal = 100%

Formula:

$$\frac{\text{Technical Score} \times \text{Ratio (90)}}{\text{Max Points}} + \frac{\text{Lowest Price} \times \text{Ratio (10)}}{\text{Bidder's Price}} = \text{Overall Score}$$

Example:

<i>Highest Combined Rating Technical Merit (90%) and Price (10%)</i>			
<i>Calculation</i>	<i>Technical Points</i>	<i>Price Points</i>	<i>Total Points</i>
Proposal 1 - Tech = 88/100 - Price = \$60,000	$\frac{88 \times 90}{100} = 79.20$	$\frac{*50 \times 10}{60} = 8.33$	= 87.53
Proposal 2 - Tech = 86/100 - Price - \$55,000	$\frac{86 \times 90}{100} = 80.10$	$\frac{*50 \times 10}{55} = 9.09$	= 89.19
Proposal 3 - Tech = 76/100 - Price = \$50,000	$\frac{76 \times 90}{100} = 68.4$	$\frac{*50 \times 10}{50} = 10$	= 78.4
<i>* Represents the lowest priced proposal Bidder 2 is successful with the highest combined rating of 89.19</i>			

1.5 To be considered Responsive, a Proposal Must:

- 1- Meet all the mandatory requirements specified in section 2.0 below;
- 2- Achieve the minimum number of points identified in each rated criteria.

1.6 The price of the Proposal will be evaluated in CANADIAN DOLLARS, Applicable Taxes excluded, FOB destination for goods/services, Customs Duties and Excise Taxes included.

1.7 Failure of a Proposal to provide information in sufficient detail and depth to permit evaluation against the identified criteria may render a Proposal non-responsive. **All Bidders are advised that only listing experience without providing any supporting data to describe where and how such experience was obtained will not be considered to be “demonstrated” for the purpose of the evaluation. All professional experience should be fully demonstrated in the Proposal (i.e., dates, number of years and months of experience).**

1.8 The Bidders acknowledge and agree that Canada is not responsible to search for, and therefore evaluate, information that is not properly referenced or is not otherwise provided in accordance with the Proposal Preparation Instructions in Part 2, Article 3.0.

1.9 Bidders shall not place any conditions or make any assumptions that attempt to limit or otherwise modify the scope of Work pursuant to the Statement of Work (Appendix B).

- 1.10 In the event two or more responsive proposals receive the same combined score, the proposal with the **highest technical score** will be ranked higher.

2.0 MANDATORY REQUIREMENTS

Failure to comply with any of the mandatory requirements will render the Proposal non-compliant and the Proposal will receive no further consideration.

Bidders should indicate the location (e.g. page, paragraph number, etc.) of the information provided in the Technical Proposal to support the mandatory requirements.

M#1. The proponent must be currently recognized as a GLP compliant laboratory to conduct laboratory analysis on pesticide residues and must provide documentary evidence of this recognition.

M#2. The proponent must fill in and submit the Residue Analysis Application Form (Appendix D Annexes 1 - 11).

M#3. The proponent must provide evidence (at least one letter of reference) of having completed a minimum of one GLP laboratory study in a satisfactory manner.

M#4. The proponent must identify how Quality Assurance will be provided.

3.0 POINT RATED REQUIREMENTS

The Bidder should address the rated requirements in the order in which they are listed and in sufficient detail so that an in-depth evaluation is possible. These criteria will be used by Agriculture and Agri-Food Canada to evaluate each Proposal. The assessment by AAFC will be based solely on the information contained in the Proposal. An item not addressed will be given zero (0) points under the point rated system. AAFC may, but is not obligated to, ask the Bidder for clarifications.

The rated requirements have been selected to provide evaluators the ability to assess the bidder capacity and ability to conduct the trial work for which a proposal has been submitted. The marking scheme reflects a balance between complexities of the criteria evaluated weighted towards the criteria deemed critical to the success of the trial (Each criteria will be marked according to completeness, clarity, and rationales provided).

Refer to Appendix D, Annexes 1 – 11 of the RFP.

Bidders must also complete the work plan/progress report template (Appendix B - Annex 11) with proposed time frames for the completion of samples.
