Amendment 2

This amendment is issued to answer questions from potential bidders.

Q10. Can you provide a mining plan and/or testhole information for the 8 Mile Pit?

A10. Info pertaining to Mile 8 pit's Aggregate Logs, Gradation Curves, Sieve Analysis Bulk, Relative Density, Micro Deval is contained in the referenced Asphalt Aggregate Resource Assessment report. A Pit plan is available in the referenced documents.

Q11. Can you provide a location plan, cross sections that clearly shows the project limits and scope of work?

A11. Refer to the Unit Price Table and Section 01 11 00, Clause 1.6 for project location and limits.

Q12. Can you provide drawings for the prefabricated bridge components and a location plan for the installation of it?

A12. Refer to Section 33 18 01, Clause 1.4. It is anticipated that bidders would be offering an off the shelf bridge design from a manufacturer local to the BC/Alberta region. Multiple manufacturers exist in BC/Alberta that have off the shelf designs for bridges that would typically meet the stated requirements with, at most, relatively minor modifications. While a bidder could supply a price for a completely new bridge design/supply, this is rather unlikely due to cost or time implications.

Q13. Can you provide more detail on the work identified as shouldering ie. Is compaction required, what is the thickness etc.

A13. Shouldering will involve placement of supplied material (could be gravel, crushed rap etc.) for buildup of depressed shoulder. Compaction will be required. Thickness will depend on depression depths.

All other terms and conditions remain unchanged.
