**This amendment 016 is raised to answer questions and modify the solicitation as follow**

**1- QUESTIONS / ANSWERS :**

**Q.220:**

At Category 4 – Wood Veneer – Freestanding Product :

Low storage (Credenza Units) – with combination open/closed, drawer/open, drawer/closed – are they to be side by side? With our standard product offering, we cannot have those combinations pedestals side by side. For example, 24" is too narrow to have the combination pedestal side by side.

**A.220:**

Combinations and locations of open and closed compartments are not specified in Annex A-1. The supplier's products meeting the minimum requirements detailed in Annex A-1.

**Q.221:**

In catalog: category 3 (files and storage) the Wardrobes in heights of less than 43 ¾" are not practical for coats. These should be classified as storage units only and be offered in 18" depth and not include coat rod and hardware.

**A.221:**

The minimum requirements for storage cabinets are detailed at article 9.4 of Annex A-1. A revised catalogue and a correction in terminology of "Wardrobes" will be included.

**Q.222:**

Annex A, 7.6.3 states that low storage is to be non-powered or powered with data capabilities, however catalogues to 2910 do not differentiate between non-powered and powered versions. Should the non-powered versions

**A.222:**

Category 4 does not require power with data capability at this time. This article applies to multiple categories and provides to add power in the future.

**Q.223:**

We cannot locate the height of wardrobes in Catalogue-Category 1b - as indicated in Amendment 7, Q/A 1; they are identified in the Product & Services Catalogues, category 1b".

Could you please review and confirm where this information can be found?

**A.223:**

Modification to Category 1b will be posted shortly.

**Q.224:**

We have not yet seen an answer issued for the following question sent on March 12 regarding ACT fabric te:

(c) All power components will be determined using a percentage within the RFB template (per Amendment 007) factored into our pricing of base-height panels as part of the catalogue ceiling pricing. But, that as per Annex A-1 we are to ensure that the products specified within the catalogues provide access to future power components include power harnesses & receptacles with each powered base panel price? (If those are included with the price, they should not be also included in the % calculations).

**A.225:**

(a), as per Amendment 007, modification (B) All Base Panels must provide access to power and data below

(b) the costs for hardware is represented by \$ cost associated to the requirement, refer to table 9, line 8 of table 2.

(c) Not all powered components will be priced using hardware total at Table 9 of RFB. Refer to Annex A-1 at the minimum requirements per product. See modification (F) of this amendment.

**Q.226:**

Category 3 – Wardrobes – excel catalogue line item #37: Please clarify that:

610mm (24 in./po) is depth x 914mm (36 in./po) is width x From/de 610mm (24 in./po) To/à 858mm (33 3/4 in.) is range of heights that are acceptable. Here is the goCUIC code as well – and has the sizes built into it WARD2DSCxxx18422433

If 24 in. to 34 ¾ in. is the height range – it is low, and is really more of a personal storage cabinet vs a wardrobe and shelf would not apply ~ is this correct? Coat rods are generally not available in cabinets less than 66 inch manufacturers of which we are aware.

**A.226:**

Refer to Answer 221.

Delete the below section of the Product catalogue 3.

SCSC2DSC0457X0914XS	Wardrobe/ Penderie	Two-Door Storage Cabinet/ Armoire à deux portes
SCSC2DSC0508X0914XS	Wardrobe/ Penderie	Two-Door Storage Cabinet/ Armoire à deux portes

SCSC2DSCXXXXXXXXXXXX	Storage Cabinets	Open Storage Cabinet/ Armoire à rangement ouvert
SCSC2DSCXXXXXXXXXXXX	Storage Cabinets	Open Storage Cabinet/ Armoire à rangement ouvert

**Q.227:**

The spreadsheet lists a requirement for a work surface supporting box/file pedestal. This seems contradictory much lower than a work surface which is typically 29"h and so it cannot support a work surface. Are you looking for a box and file with a high kick plate below the box/file section of the pedestal?

**A.227:**

A revised Product catalogue 1b will be issued shortly.

**Q.228:**

As per Question 168 and 178, since deeper pedestal shells don't necessarily mean greater filing capacity, is really acceptable? Manufacturers often make the drawers shallower than the shell while still meeting the requirement CAN\_CGSB.44.229. If the drawer depth is also a requirement, is the dimension going to be specified? Could you be revising the tolerance, please?

**A.228:**

There will be no changes to the tolerances. Please reference CAN/CGSB-44.227-2008 AND .229-2008 article file drawers must accommodate both legal and letter sized filing systems and so on. The Box Drawers must be 3/4 quarters of its full length and so on.

**Q.229:**

High / Add-on Unit, Task Light - There are several lines with this description. What configuration is required units? Fully open, partially open/closed, or closed?

**A.229:**

A revised Product catalogue 1b will be issued shortly.

**Q.230:**

Pedestal depths - According to the addenda, Q 178, pedestal depths are to be 24" and 30" with a tolerance of +/- 2". 22" and 28" deep pedestals would be acceptable in these categories. The new spreadsheets have pedestal depths of 22" and 28". Are the new sizes meant to reflect the +/- 2" tolerance? Or, are these 22"d and 28"d pedestals meant to be 24" and 28" work surfaces, which are currently not listed? Or would it mean that for these lines, 20" and 26" depths would be acceptable given the +/- 2" tolerance? Depending on the intention, there might be repeats of product or new products. Could you clarify this, please?

**A.230:** A revised Product catalogue 1b will be issued shortly. The tolerance applies to pedestal depths which

**INSERT:**      **6.23.4**    privacy screen finishes must be in *safety glass or plexiglas or acrylic*.

**B) At Part 7.0:**

**DELETE:**      **7.0**    in its entirety.

**INSERT:**      **7.0**    DETAILED REQUIREMENTS – Categories 1 and 4 - Freestanding Fixed Height Product System – laminate and wood veneer as well as painted metal finish which apply to Personal Storage Towers only.

**C) At Part 7.11:**
