Owner's Laboratory
New Bridge for the St. Lawrence Corridor

Page willfully left blank

**Owner's Laboratory Services
New Bridge on the St. Lawrence Corridor (NBSLC)**

This amendment is raised to include the new Integrity Regime and to provide answers to questions asked.

The Request for Proposals is amended as follows :

Page 3 of 17, 2.1 Standard Instructions, Clauses and Conditions

Delete 2003 (2014-09-25) Standard Instructions and replace by 2003 (2015-07-03);

Page 10 of 17, 6.3 Standard Clauses and Conditions

6.3.1 Delete General Conditions 2010B (2014-09-24) and replace by the General Conditions 2010B (2015-07-03)

Questions and Answers

Q1. Clause 11.9.5 - Item B8.5 – Vibrator and generator. Refers to supply of a vibrator, a generator and all accessories required to perform tests at the site. What tests will this equipment be used for and are there any specifications for this equipment?

A1. The supply of a vibrator and generator is not associated with a specific test. However, we can clarify that the vibrator is of the type that would be used for the vibration of cast-in place concrete and the generator is used to supply power to said vibrator. This equipment and accessories should meet the requirements of Good Industry Practice and could be required, for example and without limitation:

- a) to prepare the Authority's own test specimens on site for testing (for example, to measure in-situ air void system of hardened high performance concrete);
- b) for the preparation of concrete test blocks/specimens on the site; or
- c) if we did a test pit that involved the demolition of existing concrete, for example to carry out a boring or to determine the location of underground utilities, we may need to subsequently repair said concrete (reinstate site conditions, reconstruct a roadway slab, etc.).

Q2. The unit price for analysis in Items B5 and Items B6 refer to "preparing the sample for analysis and time and travel expenses to pick up the sample". Does this unit rate include obtaining the sample at the site or will the labour required to obtain the sample be covered by the individual Technicians rate?

A2. The labor or the time that the technician spends on site for the purpose of collecting/obtaining the sample at the job site is to be covered by the individual Technician (or other appropriate resource) rate. However, the time and travel for the transportation of the sample from the site to the laboratory is to be covered under Items B5 and B6.

Q3. Annex F – Submission Requirements and evaluation of proposals – Section 1.3 - "Should the curriculum vitae annexed to the proposal only be those of the Key Personnel? If CVs for other team members are submitted as part of the annex, will these be included in the technical evaluation?"

A3. The curriculum vitae annexed to the proposal should be those of the Key Personnel which will be evaluated. Curriculum vitae for other team members will not be evaluated.

All other clauses and conditions remains unchanged.
