

Q&A # 1

Date: July 15, 2015

Projet: Main Building Biomass Heating (Building n° 35)

Bidders must make sure that their bids are based on the latest version of the tender documents published and take into consideration the following amendments and information, including any information provided on amendments or Q&As previously published for this project.

Bidders that do not comply with this requirement will be discarded.

Question #1:

An immediate question referring to the stipulations regarding the engineering fields requested, whether mechanical, controls and electrical engineering. Our question is if other equivalent types of engineers (and, probably more adapted at a heat project requirements) would be acceptable? In our case, it would be an engineer in energy and another one in environment. Since this is not an electricity generation project and that the wood boiler controls are standardized, we don't see the need to limit the types of engineers as you are proposing.

Answer #1:

A revised required team member composition is available in addendum #1.

All other conditions and requirements remain unchanged
