

**APPENDIX “B”**

**NL Hydro Approval Letter**

March 23, 2015

Port au Choix Harbour Authority  
P.O. Box 209  
Port au Choix, NL  
A0K 4C0

**All information contained in this letter is subject to the approval of the Board of Commissioners of Public Utilities. All calculations are subject to change, based on the ruling of this Board.**

Dear Port au Choix Harbour Authority :

Thank you for your inquiry on the availability and cost of providing three phase electrical service to the Harbour Authority Facility in Port au Choix. According to the Contribution in Aid of Construction (CIAC) Policy approved by the Board of Commissioners of Public Utilities, general service customers are sometimes required to pay a portion of the construction cost of the line extension. The amount of the charge depends on both the length of the extension required and the energy requirements of the customer.

Two years following the connection of the electrical service the CIAC will be reviewed to determine the accuracy of the estimated load requirements provided to us. It is therefore important that the original load information be as accurate as possible. The CIAC will be recalculated using the actual load data for the 12 months preceding the review and if there is a variation of more than \$100.00 from the original CIAC, the difference will be applied to your electricity account as either a credit, or an additional charge.

A Hydro representative has reviewed your request and has developed a design for the line extension. The cost to construct the distribution infrastructure to supply your facility is \$2,465.00. Based on your facility requiring a three phase service with an estimated maximum demand of 25 kW, Hydro will provide an additional investment credit of \$1,800.00 toward the line construction and upgrade. Your contribution toward the construction of the extension (CIAC) is \$665.00 + \$86.45 HST totaling \$751.45. If the above load data is not accurate please contact us before April 23, 2015 with the correct information as your CIAC requirement may be adjusted as a result of the two-year review.

Your CIAC Reference Number for the above quote is 1094499 and is valid until September 23, 2015. After this date, a new quotation must be calculated to reflect possible changes in labor and material costs. Hydro, however, reserves the right to make adjustments within this six (6) month period if errors are discovered in the calculation of this estimate, in which case you will be notified immediately of the change.

Hydro will not proceed with construction of your line extension until the following is received:

- A completed and signed Application for Service Form.
- Payment of the CIAC.

Construction of your line extension, and your entitlement to any refunds or partial refunds of your CIAC, are subject to the following conditions:

1. Before construction begins, Hydro requires standard easement rights for any portion of the line that will be constructed over private property. This ensures that Hydro has access to the line and equipment should the need arise. Hydro will arrange for any necessary easements. If however, easements cannot be obtained for the proposed route, an alternate route will be determined and a corresponding CIAC will be calculated.

Please note; it generally takes eight (8) weeks to obtain easements from the Provincial Crown Lands Department if the line extension involves Crown Land. Permission for line construction and related work near bodies of water will take considerably longer due to stringent environmental regulations.

2. Should additional three-phase customers connect to the line extension within 10 years from the date of its construction, you may be entitled to a refund. Hydro will calculate the refund in accordance with established guidelines as approved by the Board of Commissioners of Public Utilities.
3. Hydro shall make all reasonable efforts to identify when a CIAC refund is required due to additional customers connecting to the line extension and to ensure the appropriate refund is paid within 90 days of any new connection. If your refund is not processed within 90 days of the connection of another customer, the refund amount will earn interest for each day past the 90-day deadline.
4. Hydro retains legal title to the line and may connect other customers to it at any time.

5. Hydro is responsible for the maintenance of the line and for its eventual replacement.

Newfoundland and Labrador Hydro looks forward to serving you. If you require additional information regarding your CIAC, please call toll-free at 1-888-737-1296 between 8:30 a.m. and 4:00 p.m., Monday to Friday.

Sincerely yours,

Murray Collier

**CONTRACT**

The undersigned hereby applies to Newfoundland and Labrador Hydro (Hydro) for the class of electric service indicated above to be rendered at the service address designated above and agrees to pay the rates to be charged for this service and to abide by the rules and regulations under which it is rendered, which rates, rules and regulations shall be as now prescribed by, or for, Hydro and as may be at any time, and from time to time, amended. The acceptance of this application by, or for, Hydro, as evidenced by a properly authorized signature, shall constitute a contract binding upon the undersigned and Hydro. Such contract shall be for a period of one year from the date hereof and from month to month thereafter.
