## Amendment 009

Amendment 009 has been raised to:

- 1) incorporate Addendum No. 5.
- 2) revise the insurance requirements.

\*\*\*\*\*

### 1) **Addendum:**

See the attached Addendum No. 5.

### 2) **Insurance Requirements:**

**DELETE** the requirement for Environmental Impairment Liability Insurance GC2040C (2014-06-26), Contractors Pollution Liability - Type 2.

See the attached revised insurance certificate.

**ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED**

The following changes in the tender documents are effective immediately. This addendum will form part of the contract documents.

This Addendum contains 1 page.

**QUESTIONS AND RESPONSES TO BIDDER'S QUERIES:**

**QUESTION:**

Drwg S-3 indicates a maximum offset of 900 mm from the existing building exterior.  
Please confirm if the "building exterior" dimension includes the width of the roof soffit overhang along the perimeter of the building?  
If the dimension does not include the width of the soffit, the access to the centre of the piles is diminished.

**RESPONSE:**

The maximum offset of 900mm from the existing building exterior is referring to the offset from the face of building exterior walls.

**QUESTION:**

Will the Owner please consider the increasing the offset from the exterior of the building (shown as maximum 900 mm on Drwg S3) to the centre the 350 mm steel pipe piles on the building perimeter?  
If so, what is the maximum increase in the offset from the building exterior?  
We are requesting an increase in the offset dimension to allow access for drill rigs that are a minimum width of 2.6 m. The access to the centerline of the piles on the exterior of the theatre building on the east wall is also restricted by the existing building structures that are as close as 8.55 m.  
Several models of the drills with the capacity to drill the 450 mm diameter exterior pile holes are mounted on mobile platforms that exceed a width of 2550 mm. These drills cannot actually fit over the plan locations of the piles given the current offset. There is no drill rig that we are aware of that could fit over the plan pile locations given the current offset.  
What is the maximum offset off the pile locations?  
Will the design allow for an offset of 1.7 m offset from the existing building? (This will account for the soffit overhang and the centerline of the drill to access the centerline of the 450 mm holes required for the installation of the 350 mm steel pipe piles.

**RESPONSE:**

The tender submission shall be based on the specified maximum offset of 900mm.

**END OF ADDENDUM NO. 5**

I certify that the above policies were issued by insurers in the course of their Insurance business in Canada, are currently in force and include the applicable insurance coverage's stated on page 2 of this Certificate of Insurance, including advance notice of cancellation / reduction in coverage.

Name of person authorized to sign on behalf of Insurer(s) (Officer, Agent, Broker)

Telephone number

Signature

Date D / M / Y

**General**

The insurance policies required on page 1 of the Certificate of Insurance must be in force and must include the insurance coverage listed under the corresponding type of insurance on this page.

The policies must insure the Contractor and must include Her Majesty the Queen in Right of Canada as represented by the Minister of Public Works and Government Services as an additional Insured.

The insurance policies must be endorsed to provide Canada with not less than thirty (30) days notice in writing in advance of a cancellation of insurance or any reduction in coverage.

Without increasing the limit of liability, the policies must protect all insured parties to the full extent of coverage provided. Further, the policies must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

**Commercial General Liability**

The insurance coverage provided must not be substantially less than that provided by the latest edition of IBC Form 2100.

The policy must either include or be endorsed to include coverage for the following exposures or hazards if the Work is subject thereto:

- (a) Blasting.
- (b) Pile driving and caisson work.
- (c) Underpinning.
- (d) Removal or weakening of support of any structure or land whether such support be natural or otherwise if the work is performed by the insured contractor.

The policy must have the following minimum limits:

- (a) **\$5,000,000** Each Occurrence Limit;
- (b) **\$10,000,000** General Aggregate Limit per policy year if the policy contains a General Aggregate; and
- (c) **\$5,000,000** Products/Completed Operations Aggregate Limit.

Umbrella or excess liability insurance may be used to achieve the required limits.

**Builder's Risk / Installation Floater**

The insurance coverage provided must not be less than that provided by the latest edition of IBC Forms 4042 and 4047.

The policy must permit use and occupancy of any of the projects, or any part thereof, where such use and occupancy is for the purposes for which a project is intended upon completion.

The policy may exclude or be endorsed to exclude coverage for loss or damage caused by asbestos, fungi or spores, cyber and terrorism.

The policy must have a limit that is **not less than the sum of the contract value** plus the declared value (if any) set forth in the contract documents of all material and equipment supplied by Canada at the site of the project to be incorporated into and form part of the finished Work. If the value of the Work is changed, the policy must be changed to reflect the revised contract value.

The policy must provide that the proceeds thereof are payable to Canada or as Canada may direct in accordance with GC10.2, "Insurance Proceeds" (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual/5/R/R2900D/2>).
