Signature	Date

Amendment 006 has been raised to extend the closing date, address the following questions and revise the mandatory criteria as follows:

A:

Closing Date:

The solicitation closing date has changed from from July 22, 2015 @ 2PM EDST to July 27, 2015 @ 2PM EST.

B:

Q1. The Automated Pharmacy Dispenser must have a LCD touch screen with a minimum (12) twelve inch diagonal length.

Question : What information will be displayed on the screen? On our system all user information is done through the web application.

No administration is done at the machine. User id themselves with a barcode reader and/or ID number.

A1. A Pass card system would be acceptable as long as there remains a password element for enhanced protection. A card by itself would not meet our privacy standards. The concern with cards would be that we have a lot of patient turnover, who would absorb the cost for the passcards?

Q2. We can Bypass the card issue.

The Soldiers that need to use the machine will receive a onetime use password via e-mail. He will id himself to the machine with his service number and then put in the password.

Is this scenario acceptable?

A2. That works for us: "The Soldiers that need to use the machine will receive a onetime use password via e-mail. He will id himself to the machine with his service number and then put in the password."

Q3. Would a 2 line display and key pad be acceptable instead of the LCD touch screen ?

A3. That would be ok.

C:

1. Delete:

Page 21 of 28, Annex A

4 - The Automated Pharmacy Dispenser must have a LCD touch screen with a minimum (12) twelve inch diagonal length.

Replace with:

Page 21 of 28, Annex A

4 - The Automated Pharmacy Dispenser must have a LCD touch screen with a minimum (12) twelve inch diagonal length or an equivalent access interface which will allow patients to log in to the automated pharmacy dispenser with a password protected user account to access their medication.
