Amendment 003

Amendment 003 is being raised to answer the following questions submitted by Bidders and to revise the RFP.

(Please note, the numbering convention continues from the previous amendment)

PART A. QUESTIONS & ANSWERS

Q10: A1.12 The standard documented specifications for this classification of print devices is normally letter, legal and tabloid (11 x 17"), In order for vendors to provide proper documentation, We respectfully request for the crown to modify this specification to 65ppm on 11x17.

A10: We accept to modify the specification to 65 ppm for 11×17" sized paper.

Q11: A1.31 This specification is more in line with a colour production printer and not a monochrome device, we respectfully request for the crown to remove A1.31 in its entirety.

A11: We accept to remove A1.31 in its entirety for the monochrome printers only.

Q12: All print devices: We respectfully request if you could confirm that you are looking for an external print server for each print device.

A12: Yes I do confirm that we are looking for an external print server for each printer.

Q13: All print devices: We respectfully request if you could confirm that you are looking for a full human interface for each print server including keyboard, mouse and screen

A13: Yes, I do confirm that we are looking for a full human interface for each printer server, which includes a keyboard, mouse and screen.

Q14: All print devices: we respectfully request if you could confirm that you are looking for a colour interface on all printers to simplify operations.

A14: We would prefer a colour interface, but the interface **must** be compatible across all 3 production printers.

Q15: Would PWGSC reconsider the option to provide a 200 sheet dual scanning feeder (400 images in one pass) and with batch scanning capabilities as an option?

A15: No, the document feeder capacity must be a minimum of 250 sheets.

Q16: With regards to Annex B that identifies the total average monthly volumes, would it be possible to get a break down of how the average monthly volume splits out in terms of letter, legal and 11 x 17 output for each device?

A16: We do not track our volume by paper size. Our best estimate of percentage by volume for all devices would be approximately: 8.5 X 11 at 90%; 8.5 X 14 at 5% and 11 X 17 at 5%.
