

## Q&A #2

Date: July 22, 2015

Project: London Paving Project

---

Bidders must make sure that their bids are based on the latest version of the tender documents published and take into consideration the following amendments and information, including any information provided in amendments or Q&As previously published for this project.

Bidders that do not comply with this requirement will be discarded.

---

**Q10:** I viewed addendum 3. The specifications now mention placing the surface asphalt at 40mm depth as compared to previously at 30mm depth. I would request clarification on how this would preferred to be performed:

Option A - remove 10mm depth of existing underlying granulars in order for the grades to remain the same as they currently are

Option B - do not remove any granular, adjust catchbasins to suit new higher elevations, and install asphalt as specified.

**A10:** See Addendum #4 (Point #9).

---

All other conditions and requirements remain unchanged.
