## **Amendment 1**

This amendment is issued to answer questions from potential bidders.

### **Questions**

- Q1.** I am inquiring whether or not the blaster needs to carry a valid provincial blasting certificate
- A1.** Crew qualifications are set out in Section 01 11 00 of the Specification. With respect to the Blaster, please refer to Section 31 23 21 Part 3.2 Quality Control, paragraph 4, which states; The Blaster shall be licensed with Worksafe Alberta, and shall have designed and carried out trim blasts for at least four (4) similar projects in the last five (5) years.
- Q2.** The Johnston Canyon job shows an allowance for bolting instead of blasting - is this up to the contractor, or the engineer to make this decision.
- A2.** At the location of the trim blast, an alternative to trim blasting is bolting, it is up to the Departmental Representative to make this decision. At present 186 m of rock bolting (of various individual lengths) have been incorporated within the Unit Price Table, and are envisaged to be installed at or around the locations shown in the annotated photographs.

**All other terms and conditions remain unchanged.**
