

RECEIVED QUESTIONS :

Q : Since a Preaction System functions with a detection system and nothing is mentioned on drawings or little in specifications and no addenda's. More information is required what work is to be done. Normally the Space Agency takes care of it. I would assume any modifications is by others. Is this correct?

A: The fire detection system and components are included in the Electrical documents.

Q: Who is in charge of installing and supplying the detectors for the pre-action sprinkler network?

A: The fire detection system and components are included in the Electrical documents.

Q : In relation to the addenda received today, plan A-205 has not been included although it is part of the general list art 2.

A: Addendum architecture 02 corrects the drawing list issued in addenda architecture 01

Q : We wish to know if the electrician should include in his price the cost of telecommunication, because the details for it are in the addendum 1 electrical plans (E70).

A: Yes.

Q : Our flooring subtrade informed us that he had discussions with Tapis Aspect and was informed that they will no longer distribute LEES carpeting. He cannot locate another distributor for this carpet type. Would you be able to inform us of an alternate distributor to Tapis Aspect or can you indicate an alternate.

A: Manon Houle
