This solicitation amendment (2) is raised to answer vendors' questions.

Question 1: Drawings: the Main Panel in drawing ASS-30-R drawing for Basic Positioning Diagram - Dodge Charger - looks to be an extrusion - whereas the same part on the Main Panel drawing - is viewed as milled material - can you clarify whether it is to be extruded material or milled material in the final submission or is it optional? Best design / best price?

Answer 1: It can be either an extrusion or a milled part, it is an option to give more leeway to the vendor/manufacturer. The aluminum part of course requires anodizing etc. from a refinishing perspective.

Question 2: Annex 'A' - in terms of supply of the sample - 3. Operational Requirements - 3.2 - Locking mechanism - is a functioning version of the locking mechanism required on the sample prototype provided with the quote?

Answer 2: Yes. A functioning version of the locking mechanism is required on the sample prototype to be provided with the quote.

Question 3. Overall - are these in production / supply now from a current supplier? it appears that these are both available commercially and or already in use from a previous manufacturer's design.? It appears the quote was tendered as RFQ only due to dollar value.? I attempted to view interested supplier PDF but there were no entries.? If there is someone supplying these parts / assembly now - are they within Canada or External supplier?

Answer 3: These specifications were built by RCMP technicians for this requirement and this is the first time these specifications are used in a solicitation process. This RFSO is tendered to allow any and all interested and capable vendors to submit an offer. Unfortunately, we are unable to view a list of vendors that have downloaded the tender, but the website indicates that there are over 42 events with the solicitation and a subsequent 13 events associated with amendment #1 (as of Aug 18th). There are currently no vendors, Canadian or External, supplying this assembly.

All other term and condition remain unchanged
