**Q1** The title of this RFP refers to Waste & Recycling Disposal Services, however in the body of the tender it seems to only request pricing for Waste. Can we propose alternate pricing for recycling that might save you money?

**A1** No, thank you.

**Q2** Are any of the items listed in the tender being recycled now or is all the material going as waste?

**A2** What the contracted service provider does with the material being picked-up is up to them, price accordingly.

**Q3** Is there an opportunity for us to implement a recycling program for the office waste and packaging that can save you money?

**A3** This is primarily manufacturing waste, not office waste. Material that can be recycled should be done at the sites already as we have internal recycle programs to reduce costs, etc. with Environmental Officers monitoring.
