

Q1 You have suggested that the performance period shall be contract award to March 31, 2016. Is it safe to assume that you want these images captured prior to any snow cover?

A1 Yes. Otherwise how could the digital verification from the aerial to the site services plan be accomplished?

Q2 Could you further detail your expectations or delineate the difference between what is referred to as a high resolution image file (referenced in No.5 of Deliverables in Annex A) and Digital files in TIFF (referenced in No.6 of Deliverables in Annex A).

A2 They could be considered one in the same as the highest resolution files will be used for converting to digital format for verification of the existing site services plans and the same files converted into TIFF files for graphic (photo) storage and reproduction.
