CANADIAN COAST GUARD FULL FLIGHT SIMULATOR PROCUREMENT

The purpose of this Amendment 005 is to:

- provide answers to questions received in response to the RFP

1. The question received and the associated answer is listed in table below.

FFS-37	Question	RFP Reference: DID T-011: In DID T-011 of the RFP Simulator Data Plan the Crown requests that it contain the methodology used to ensure that the FFS has all the necessary data to meet level D requirements and support the CCG's mission training needs. Given that the flight data will not be made available by the OEM until contract award, please confirm that it is sufficient to demonstrate our data analysis for the performance systems; flight, flight controls and engines at the bid proposal phase. The aforementioned performance systems represent the most critical necessary systems required to achieve level D certification. The same methodology used for the performance systems will be used for all other ancillary systems. Please also confirm that it is acceptable to provide the ancillary data systems plan at PDR, once the data is available.
	Answer	As defined in Annex E – FFS Bid Evaluation Score Sheet the requirement at bid is to provide a report that 'clearly demonstrates' an understanding of the data requirements and convinces the reader that 'there is minimal risk that the solution will not meet the training needs of CCG.' Canada cannot provide guidance to bidders regarding what systems to include in the report and what systems can be left until post contract award. It is up to the bidder to give readers confidence that the proposed methodology will ensure that the necessary data will be in place to support an FFS that will meet the training needs of Canada.
