**ANNEX C – TECHNICAL EVALUATION CRITERIA
(Revised September 21, 2015)**

**Specification for Cloth, Coated, Waterproof, Weather Resistant
For TEMS, Waterproof Fly**

1. SCOPE

- 1.1. Scope. This specification covers the requirements for the cloth intended for use in the TEMS Rain Fly.

2. APPLICABLE DOCUMENTS

- 2.1. Government Documents. None
- 2.2. Other Publications. The following documents form part of this specification to the extent specified herein. Effective dates shall be those in effect on the date of manufacture. Sources are as shown.

19428-2959, USA
E-mail: service@astm.org
Website : www.astm.org

- 2.3 Sealed Patterns – Not Available

- 2.4 Order of Precedence. In the event of inconsistency within this specification, including any inconsistency between languages, The Technical Authority shall be contacted for clarification.

3. REQUIREMENTS

- 3.1. Workmanship. The material covered by this specification shall be free of imperfections or blemishes such as may adversely affect its appearance or serviceability. For inspection purposes, imperfections and blemishes shall be considered defects when clearly visible at a normal inspection distance of approximately 1 meter under good, preferably North Light, lighting conditions.

3.2. Materials

- 3.2.1. Base Cloth. The base cloth shall be such that when coated with PVC the resulting coated fabric shall meet the requirements in Table I.
- 3.2.2. Coated Fabric. The finished fabric shall be coated on both sides to a minimum usable width of 59 inches. The base cloth shall remain undisturbed with no crimps, kinks or other deformations.
- 3.2.2.1. The finished fabric shall not pose a risk to the health of personnel or the environment when used as intended.

- 3.2.3. Coatings. Coatings shall be uniformly applied, and shall be free of bubbles, pinholes, thin spots, delamination and any other coating defects. The pigments used shall be lightfast, resistant to hydrolysis and mildew, and uniformly distributed in the coating compound.
- 3.2.3.1. The coating compound shall contain an evenly dispersed flame inhibitor to meet the requirements in Table I.
- 3.2.4 Seams. Items made with this fabric will require seams to be welded and sewn. The physical appearance of all welds shall be neat and clean with no air bubbles, no excess plastic flow, and the base substrate shall not be crimped, kinked or otherwise disturbed.
- 3.2.5. Finish. Any finishes applied must not affect the fabric welding performance.
- 3.2.6. Colour Requirements. The colour shall be a military green such as Canadian Average Green, Olive Green or Olive Drab and must be acceptable to Technical Authority.
- 3.2.7. Selvedges. Selvedges shall be firm, and straight.
- 3.2.8. Length. The cloth shall be delivered in pieces of approx 100 metres with not more than two lengths per piece, the shorter piece shall not be less than 20 metres.
- 3.2.9. Piece Marking. Each piece of cloth shall have an identification label securely attached to the selvedge at one end. The label shall include the gross length, number of lengths per piece, Nomenclature, Colour, contract number.

4. QUALITY ASSURANCE PROVISIONS

- 4.1. The contractor is responsible for the performance of all inspection requirements. Contractors may utilize their own or any other inspection facility acceptable to the Government. The Government reserves the right to perform any of the inspection specified herein where such inspections are deemed necessary to ensure material and services conform to prescribed requirements. The contractor is responsible for ensuring that all material or services submitted to the Government for acceptance comply with all requirements of the contract.

5. PREPARATION FOR DELIVERY

- 5.1. Packaging and packing. Packaging, packing, delivery and marking of shipping containers shall be in accordance with the terms of the contract.
- 5.2. The rolls must be delivered on pallets, wrapped in plastic bags. **A compliance report must be provided at delivery. The cloth must be as per specification.**
- 5.3. Minimum quantity per call-up is 500 meters
- Delivery shall be Monday to Friday, 8:00 to 3:00 p.m.
 - Delivery date must be confirmed 1 day prior.
 - Delivery required: Within (14) calendar days of receipt of a call-up against the standing offer.

6. NOTES

6.1 The production of a product to this specification, or the evaluation of a product to this specification, may require the use of materials and or equipment that could be hazardous. This specification does not purport to address all safety, health and environmental concerns, if any associated with its use. It is the responsibility of the user of this specification to establish appropriate safety, health and environmental practices and to determine the applicability of regulatory limitation prior to use.

6.2 The Technical Authority for this specification is DCSEM 4-9,

6.3 Kim Schembri, 819-994-8359.

Table I – Finished Fabric

Property	Test Method	Requirement
Mass (g/m ²)	ASTM D 751-06 Section 10	Maximum: 340
Breaking Strength (N)	ASTM D 751-06 Section 12-15	Minimum, Warp: 565 Minimum, Weft: 485
Hydrostatic Resistance (kPa)	CAN/CSB-4.2 No 26.5	Initial, Minimum: 900
	After exposure to Cold Temperature: ASTM D751 (Para 61-64), 30 minutes @ -7° C then CAN/CSB-4.2 No 26.5	- 10 %
Welded Seam Strength * (N/25mm)	ASTM D 751-06 Section 66-71	Minimum: 300
Blocking (Heat)	ASTM D 751-06 Section 84-88	Face to Face: 1 Back to Face: 1 Cloth surfaces may adhere slightly
Flame Resistance	Must meet the requirements of CAN/ULC S109	
Gloss (Gloss unit)	ASTM D523, face side only	20 degree: 2.5 60 degree: 5.0 85 degree: 7.0

*For testing purposes, seams shall be welded in a face to back configuration. The width of the welded seam shall be 25.4 mm (1 inch). Welded seams for testing shall be provided by the end item manufacturer and shall be fully representative of end item production.

- **Bidders must provide two (2) samples in the specified colour, each at least one (1) meter X one (1) meter.**

- Bidders must have available test results from a certified independent testing laboratory confirming that the fabric samples submitted with their bid meets the mandatory requirement. If the test results are available, please include with the bid. If these test results are not provided with the bid, the Contracting Authority will so inform the Bidder and provide the Bidder with a time frame within which to meet this requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within that time period will render the bid non-responsive.
