This amendment is raised to publish all answers to the questions received as of September 16, 2015 and to modify the mandatory specification at Annex B.

Questions & Answers

- Q.1 Mandatory requirement for Backscatter has been removed we are looking to have it reinstated and are officially requesting an extension as this has changed so recently (amendment sept 15th)

It is our stance that Backscatter will enable users to more quickly detect organics, when transmission will detect it as well, but that Backscatter also detects threats when dual energy cannot. We have performed these tests alongside PWGSC in the past in order to prove the backscatter technology is mandatory for the end users needs.

Backscatter in our case also is run by a second generator which will allow scans to be completed even if there is a failure with one. Even with dual source transmission only if one generator goes down the machine no longer operates.

I would like to have a conversation over the phone in order to further explain and provide the specifics of our previous testing (end user and PWGSC personnel during the testing). We are available to demonstrate the above statement, and would suggest that performance testing be included.

- A.1 Conversation over the phone with the client is not permitted during this process, we must ensure that the process remain fair and transparent for all suppliers.
The client has no requirement or need for a Backscatter.
This Request for Proposal has been extended until October 5, 2015
