Amendment # 3 to the Request for Proposal (RFP) 23375-160220/B which closes on October 05, 2015 at 2:00 PM is raised to:

Provide answers to questions received from Bidders.

Q1. If we confirm that the tanks will be designed as per API 12F, including shape, materials and openings as noted in the API 12F specifications do they need the "API" 12F stamp, on the vessel nameplate, or can be without?

A1. No, the API 12F stamp on the vessel nameplate is not required so long as sufficient documentation showing compliance is supplied.

Q2. Regarding "or equivalent", can tanks be made to ASME BPV Section VIII Div 1 design, with suitable openings and connections as noted in Annex A? As the tanks are designed for 4 oz/in² pressure, TSSA registration will not apply.

A2. TSSA will not apply on the tanks but the gas fired heaters must be TSSA Fuels compliant. It is the responsibility of the contractor to determine what is required of a gas fired "appliance" in order to be TSSA Fuels compliant.

All other terms and conditions of the Request for Proposal remain unchanged.
