This page has been left blank intentionally.

This amendment is raised to answer questions from potential bidders.

Q6. Would it be acceptable to submit samples in a color other than grey to demonstrate capability and compliance to the technical requirements and a color swatch to show we could supply the correct color?

A6. The bidder may submit pre-award underwear samples in a colour other than gray provided that the bidder also submits a colour swatch in the correct colour. The colour swatch (lab dip) must use the same fabric (composition, construction, weight) as the underwear samples.

Q7. Concerning Annex B section 3.5 Materials (sub-section 3.5.1 Body Fabric : do elastomer fibres (example –Spandex) add to the total of the thermoplastic fibres. For example, if the fabric has a thermoplastic fiber content of 40% and there is 6% elastomer fibers added to the fabric – is the total of the thermoplastic fibres now 46% ?

A7. For the body fabric fibre content, the 6% elastomer limit may be considered to be outside of the 40% thermoplastic fibre limit as long as all the requirements for heat resistance and thermal stability are met in addition to all other stated performance requirements.

Q8. Mass is always specified as mid-point or target weight with a +/- 10% tolerance. Your range is too wide and makes no sense technically. What weight do you want?

A8. The specification indicates the target nominal mass. It does not indicate the production tolerance for mass. However, it is expected that production tolerance will be +/-10% and will be articulated in the submission. The bidder must propose an appropriate fabric mass (nominal +/- tolerance) within the range specified in Annex B Table I.

Q9. What stitch are you looking for? Jersey? Rib? Interlock? Most likely a jersey but the specs of weight and stretch can be met by more than 1 type of knit.

A9.No specific fabric construction or knitting method is targeted or excluded. The bidder must propose a fabric that meets the requirements of the specification.

Q10.Heat Resistance- no melt no drip no ignition. Is modacrylic eligible? Is the jersey fabric used for the body in the hybrid shirt being targeted? Is a poly/cotton blend eligible?

A.10 No specific fabric is targeted or excluded. The bidder must propose a fabric that meets the requirements of the specification.

All other terms and conditions remain the same.
