Breaking Strength	9.2*	Warp: 500 N Weft: 500 N	

QUESTIONS / ANSWERS

Q10. In reference to sections 4.1.1 and 4.2 are all 6 ballistic performance requirements and areal density weighted equally in determining the ballistic aggregate score and the weighted ballistic score?

A10. That is correct. Each requirement is weighted 5% for a sub-total of 35/70 for the technical merit score.

Q11. In reference to sections 4.1.1 and 4.2 if a particular ballistic solution exceeds any of the performance values on the scaling graphs in section 4.1.1 will more than 100 points be awarded for that criteria?

A11. NO, 100% is the maximum that can be achieved; for example a V50 for 1 grain sphere that is greater than or equal to 590m/s will receive 100%.

Q12. Will DND provide a sample of the in service Gen II BRP for fit purposes during the production of the pre award samples?

A12. Graded patterns are provided for all sizes and will be assessed at First Article prior to production approval. Attention is drawn to SOW (Annex B) section 3.4.1 on contractor designed and manufactured gauge sets and the need to address this requirement in the written proposals section 3 of Annex F. Also of particular note are the highlighted critical dimensions in Annexes C1.

All other terms and conditions remain the same.
