## The amendment is to answer bidders' questions

### Question 1:

The current cards being used by RCMP are iClass 32k + Mifare 4k  
The tender calls for iClass SE 32k + Mifare 1k + Embeddable (for Safenet chip)  
This combination does not exist with HID, in the iClass **SE** line of credentials.

### Response 1:

We need iClass SE 32k + Mifare 4k + Embeddable (for Safenet chip)

We asked for 1k because we thought it was cheaper, if the only technology available is 4k then, that works with our system as well.

### Question 2:

We need clarification on what their plan and/or priority is:

- going up to **SE** from regular **iClass** is most important ?
- **Mifare 1k** is most important, or is it **Mifare 4k** ?

There are a few combinations possible, however the one specified in the current tender does not work, and it is not the same as their last tender and current cards.

### Response 2:

We are **NOT** going up to SE from regular iClass, we are on iClass SE as we speak.  
We do require MiFare Classic on the badge, 1k or 4k doesn't matter.

Keep in mind, we do need three different types of cards with a miss-match of those 3 technologies. All clearly explained in the RFP.

**All other terms and conditions remain unchanged**
