#### 6.3.1 General Conditions

2010A (2015-07-03) General Conditions - Goods (Medium Complexity), apply to and form part of the Contract.

The 2010A (2015-07-03), General Conditions - Goods (Medium Complexity) is appended with Section 31 - Intellectual Property Infringement and Royalties, as follows:

- 1) The Contractor represents and warrants that, to the best of its knowledge, neither it nor Canada will infringe any third party's intellectual property rights in performing or using the Work, and that Canada will have no obligation to pay royalties of any kind to anyone in connection with the Work.
- 2) If anyone makes a claim against Canada or the Contractor concerning intellectual property infringement or royalties related to the Work, that Party agrees to notify the other Party in writing immediately. If anyone brings a claim against Canada, according to [Department of Justice Act](#), R.S. 1985, c. J-2, the Attorney General of Canada must have the regulation and conduct of all litigation for or against Canada, but the Attorney General may request that the Contractor defend Canada against the claim. In either case, the Contractor agrees to participate fully in the defence and any settlement negotiations and to pay all costs, damages and legal costs incurred or payable as a result of the claim, including the amount of any settlement. Both Parties agree not to settle any claim unless the other Party first approves the settlement in writing.
- 3) The Contractor has no obligation regarding claims that were only made because:
  - (a) Canada modified the Work or part of the Work without the Contractor's consent or used the Work or part of the Work without following a requirement of the Contract; or
  - (b) Canada used the Work or part of the Work with a product that the Contractor did not supply under the Contract (unless that use is described in the Contract or the manufacturer's specifications); or
  - (c) the Contractor used equipment, drawings, specifications or other information supplied to the Contractor by Canada (or by someone authorized by Canada); or
  - (d) the Contractor used a specific item of equipment or software that it obtained because of specific instructions from the Contracting Authority; however, this exception only applies if the Contractor has included the following language in its own contract with the supplier of that equipment or software: "[Supplier name] acknowledges that the purchased items will be used by the Government of Canada. If a third party claims that equipment or software supplied under this contract infringes any intellectual property right, [supplier name], if requested to do so by either [Contractor name] or Canada, will defend both [Contractor name] and Canada against that claim at its own expense and will pay all costs, damages and legal fees payable as a result of that infringement." Obtaining this protection from the supplier is the Contractor's responsibility and, if the Contractor does not do so, it will be responsible to Canada for the claim.

- 4) If anyone claims that, as a result of the Work, the Contractor or Canada is infringing its intellectual property rights, the Contractor must immediately do one of the following:
- (a) take whatever steps are necessary to allow Canada to continue to use the allegedly infringing part of the Work; or
  - (b) modify or replace the Work to avoid intellectual property infringement, while ensuring that the Work continues to meet all the requirements of the Contract; or
  - (c) take back the Work and refund any part of the Contract Price that Canada has already paid.

If the Contractor determines that none of these alternatives can reasonably be achieved, or if the Contractor fails to take any of these steps within a reasonable amount of time, Canada may choose either to require the Contractor to do (c), or to take whatever steps are necessary to acquire the rights to use the allegedly infringing part(s) of the Work itself, in which case the Contractor must reimburse Canada for all the costs it incurs to do so.

## ANNEX B MANDATORY SPECIFICATIONS FOR MANUAL MASS COMPARATORS

The requirements listed below are for digital electronic manual mass comparators that are to be used in the Measurement Canada Approval and Calibration Services Laboratory for the calibration of mass standards.

**Bidders must cross reference the mandatory technical criteria in a concise format by using page, paragraph(s) & sub-paragraphs as applicable to their supporting technical documentation.**

1.0	Mandatory Specifications / Technical Criteria  Item 001 Manual Mass Comparator – 111g x 1 µg	Referenced in Contractors Proposal
1.1	Maximum Capacity: > 110 g	
1.2	Readability: 1 µg	
1.3	Repeatability: (5 ABA): 5 µg	
1.4	Eccentricity: Difference in weighing results between a load at the center and at half the distance between the centre and edge must not exceed 75 µg (does not apply to devices using a centering or hanging pan).	
1.5	Must include a draft shield	
1.6	Must include a RS-232 communication port	
1.7	Eccentricity must have (off-center ) load compensation	
2.0	Mandatory Specifications / Technical Criteria  Item 002 Manual Mass Comparator – 1110g x 0.01 mg	
2.1	Maximum Capacity: > 1100 g	
2.2	Readability: 0.01 mg	
2.3	Repeatability: (5 ABA): 0.05 mg	
2.4	Eccentricity: Difference in weighing results between a load at the center and at half the distance between the centre and edge must not exceed 0.075 mg (does not apply to devices using a centering or hanging pan).	
2.5	Must include a draft shield	
2.6	Must include a RS-232 communication port	
2.7	Eccentricity must have (off-center ) load compensation	

**Note:** Comparators to be used in a laboratory that is maintained at 20°C ±1°C, 50% RH ± 10%, at ambient air pressure, with no strong drafts. Comparators Balances have a very high resolution distinguished by extremely high repeatability and the detecting of small weight variations, especially if the sample/object is large compared with the weight change. Comparator Balances are typically used for weight measurement analysis of national standards mass. Clients typically include legal metrology services, in-house calibration laboratories, and weights and measures offices. Additional uses would be any weighing application requiring absolute weighing with an extremely high resolution.
