ADDENDUM TO REQUEST FOR PROPOSAL  
FOR  
Val Marie and West Val Marie Dams  
Service Contract No. 5  
Geotechnical Reviews  
REQUEST FOR PROPOSAL # 4547:928-7V1-0-S1-5

Addendum No. 1

1. The date for the submission of proposals is hereby changed as follows:

**Submissions will be received up to 2:00 p.m., local Regina time, October 29, 2015.**

Question and Answer:

Q1 - In the supplemental information that was provided to the proponents for the Val Marie Dam the attached test hole logs (C117, C119, C120) are not shown on the corresponding map and conversely the test holes shown on the map (C113, C114 C115 and C116) where not included in the supplemental information. Would be possible to get the test hole logs for C113, C114 C115 and C116.

A1 - The test hole logs C117, C119 and C120 are not on the map as it appears the map was created before these were drilled – and not updated.

Piezometer C113 is actually shown on plan 356904 with borehole C117, piezometer C114 on plan 356905 with borehole C121, piezometer C115 on plan 356906 with borehole C119, and piezometer C116 on plan 356905 with borehole C120. These plans were included in the supplementary information, however plan 356905 for Piezometer C114 was not included because it has been was decommissioned - is now attached.

Q2 - Would it be possible for the proponents to get a copy of the groundwater monitoring data that has been collected to date at both the Val Marie and West Val Marie Dams.

A2 - We will provide this data after reward of contract.
