SOLICITATION AMENDMENT 002 IS RAISED TO ANSWER THE FOLLOWING QUESTIONS:

Question 1:

“I was just wondering if we were going to be penalized if we provide a system that does not include the onion tank? We consider that this step of treatment can be removed and replaced by a much smaller equipment that will allow the system to be resilient to turbidity peaks.”

Answer 1:

“The supplier must provide the Portable Water Purification System (PWPS) in accordance with the Request for Proposal (RFP). If a supplier proposes a bid without the onion tank, the supplier will be considered non-compliant. After contract award, design changes/deviations to the Statement of Work (SOW) can be done in accordance with the paragraph 6.2.1 Part 2, page 8 of 14 of the RFP.”

Question 2:

“In the technical specification document, section 3.2.4.2, it is specified that the final filtration step has to be down to 1 micrometer. This said, it is also mentioned in section 3.1.5 that the filtration system has to be able to lower the TDS level from a maximum of 1000 ppm to less than 500ppm. The filtration would have to be much smaller than 1 microns to have an impact on the TDS level. Can you please clarify that matter please? You expect to have a final filter of 1 micron or lower TDS level down to 500ppm?”

Answer 2:

“Delete the last part of the paragraph 3.2.3.2 “the last one to be down to 1 micrometer (0,001mm)””

****ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED. ****
