6.3.1 General Conditions

2010A (2015-07-03) General Conditions - Goods (Medium Complexity), apply to and form part of the Contract.

The 2010A (2014-11-27), General Conditions - Goods (Medium Complexity) is appended with Section 31 - Intellectual Property Infringement and Royalties, as follows:

- 1) The Contractor represents and warrants that, to the best of its knowledge, neither it nor Canada will infringe any third party's intellectual property rights in performing or using the Work, and that Canada will have no obligation to pay royalties of any kind to anyone in connection with the Work.

- 2) If anyone makes a claim against Canada or the Contractor concerning intellectual property infringement or royalties related to the Work, that Party agrees to notify the other Party in writing immediately. If anyone brings a claim against Canada, according to [Department of Justice Act](#), R.S. 1985, c. J-2, the Attorney General of Canada must have the regulation and conduct of all litigation for or against Canada, but the Attorney General may request that the Contractor defend Canada against the claim. In either case, the Contractor agrees to participate fully in the defence and any settlement negotiations and to pay all costs, damages and legal costs incurred or payable as a result of the claim, including the amount of any settlement. Both Parties agree not to settle any claim unless the other Party first approves the settlement in writing.
- 3) The Contractor has no obligation regarding claims that were only made because:
- (a) Canada modified the Work or part of the Work without the Contractor's consent or used the Work or part of the Work without following a requirement of the Contract; or
 - (b) Canada used the Work or part of the Work with a product that the Contractor did not supply under the Contract (unless that use is described in the Contract or the manufacturer's specifications); or
 - (c) the Contractor used equipment, drawings, specifications or other information supplied to the Contractor by Canada (or by someone authorized by Canada); or
 - (d) the Contractor used a specific item of equipment or software that it obtained because of specific instructions from the Contracting Authority; however, this exception only applies if the Contractor has included the following language in its own contract with the supplier of that equipment or software: "[Supplier name] acknowledges that the purchased items will be used by the Government of Canada. If a third party claims that equipment or software supplied under this contract infringes any intellectual property right, [supplier name], if requested to do so by either [Contractor name] or Canada, will defend both [Contractor name] and Canada against that claim at its own expense and will pay all costs, damages and legal fees payable as a result of that infringement." Obtaining this protection from the supplier is the Contractor's responsibility and, if the Contractor does not do so, it will be responsible to Canada for the claim.
- 4) If anyone claims that, as a result of the Work, the Contractor or Canada is infringing its intellectual property rights, the Contractor must immediately do one of the following:
- (a) take whatever steps are necessary to allow Canada to continue to use the allegedly infringing part of the Work; or
 - (b) modify or replace the Work to avoid intellectual property infringement, while ensuring that the Work continues to meet all the requirements of the Contract; or
 - (c) take back the Work and refund any part of the Contract Price that Canada has already paid.

If the Contractor determines that none of these alternatives can reasonably be achieved, or if the Contractor fails to take any of these steps within a reasonable amount of time, Canada may choose either to require the Contractor to do (c), or to take whatever steps are necessary to acquire the rights to use the allegedly infringing part(s) of the Work itself, in which case the Contractor must reimburse Canada for all the costs it incurs to do so.

1.3	The conductivity must be done via a flow-through cell, with a constant of K=1 offering typical sample conductivity range 1-2000 µS.	
1.4	The pH resolution must be no greater than a 0.01 pH unit	
1.5	The system must include a temperature compensation feature located at the site of pH measurement	
1.6	The system minimum detection limit (MDL) for alkalinity must be < 0.5ppm with < 15 mL sample	
1.7	The system must have an integrated autosampler with a minimum of 200 positions each accommodating 15ml sample tubes	
1.8	Space constraints mandate that the autosampler footprint be less than or equal to 18" X 24".	
1.9	The system must allow for flexibility in the sample volume pipetted (250µl increments)	
1.10	The system must allow for programmed automated autodilution while still in the sample	
1.11	The system must determine the optimum rinse protocol by, for example, monitoring the concentration results of the previous sample, to ensure that the entire system is clean before analyzing the next sample

Mand Spec #	Mandatory Specifications	Reference in Contractors Proposal
1.12	The system must accommodate user interruption of an ongoing analysis run to process priority/rush samples. Priority samples can thus be added and analyzed immediately or at any point in the scheduled run once an autosampler location is defined.	
1.13	The system must be modular to accommodate future module additions such as fluoride analysis.	
2.0 CPU/SOFTWARE		
2.1	The software must display , in real time, results of all samples, QCs and calibrations analyzed during a run	
2.2	The software must allow pH and conductivity calibration for up to 16 standards using linear, quadratic or multi-point (point-to-point) calibration fitting	
2.3	The system must include Windows 7 Pro Desktop System	
2.4	The system must include a minimum 21" flat screen monitor
