Tender Questions #2

Solicitation No. EP837-161021/A

Carling Campus – Department of National Defense

Workstation RISO

- Q6. Both layout A and layout B are on the floor plan. Would you like us to price out both 8-pack layouts?

- A6. Both layouts need to be incorporated into pricing the entire floor plan.

Replace Part 4, 4.1.2.1, MFC 1.1 with the following:

Offerors must complete and submit their financial offer in accordance with Annex B-1 – Basis of Payment and Annex B-2 – Financial Evaluation. Annex B-2 – Financial Evaluation must be done to complete the floor plan provided Annex A-3. The total amount of Applicable Taxes must be shown separately.

- Q7. Most manufacturers' faceplate tile to accept the 4-port data conduit will be horizontal. As long as the data requirements are met, will you accept horizontal quadraplex data outlets?
- A7. **Yes, a horizontal quadraplex communication module knockout will be accepted. In the research done on the requirements, there was not a manufacturer found that provides a vertical knock-out. Also, the technical specifications detailed for the bend radius' will not be able to be met using a vertical knockout.**
- Q8. When you reference raceways are you speaking about zones within the frames that house different cabling (i.e. Raceway #2 must accommodate a min. of 16 copper communication cables)? OR Are you speaking about powered raceways within the frame that house tracks with duplexes?

- A8. **A raceway (or cable pathway) is referenced as a furniture part that the cables sit in. Whether it is copper, fibre or power, the requirement is to have them housed in their own raceway in the systems furniture.**
