ADDENDUM # 1

Re: Request for Proposals T8080-150036
Supply Chain Analysis on Canadian Petroleum Industry

No consideration will be given for extras and/or changes because the tenderer was not familiar with the contents of this Addendum.

A question has been received from potential tenderer about the subject Request for Proposals. The purpose of this Addendum to the Request for Proposals is to summarize the question and answer the information of all potential bidders.

Question # 1:

Will Transport Canada provide a list of the DG products they are interested in assessing, or is it major products that move, in full truckloads and railcars, to terminals sites and refiners? as there may be LTL shipments which would be impossible to map.

Answer # 1:

We would expect the consultant(s) to identify all DG products going in and out of the various locations however we would only ask for the mapping of full loads – i.e truckloads, railcar loads and, if applicable, vessel loads.

Tenderers are to acknowledge this Addendum by signing in the space provide below and enclosing a copy of this document with their Technical proposal.

All other terms and conditions of the Request for Proposals remain unchanged.

Yours truly,
