Solicitation Amendment # 011 is raised to respond to the following question from industry:

Question # 013:

An additional request to include a Limitation of Liability in this Standing Offer was received.

Answer # 013:

Please also see response to Question # 10. The federal government does not generally encourage the practice of indemnifying contractors and limiting contractor liability in procurement contracts. For this procurement, it has been determined that the Standing Offer shall remain silent with respect to indemnification and limitation of liability and rely on the principles of common or civil law.

Question # 14:

The engineering for the BSB development was broken out into a separate line item in the Annex B - TSOR (3.8.2) and Annex D – Evaluation Plan - Section 1.2.2 for Acceptance Testing was not updated to include 3.8.2. So, is it possible that the BSB development is not part of the Acceptance Test? If so, how do we demonstrate compliance with the BSB requirement?

Answer # 14:

BSB development will be completed up to a year after the contract is awarded and is not included in the initial acceptance testing. Canada reserves the right to perform an acceptance test at the time of the BSB charting feature software delivery. Until delivery of the BSB charting feature, Canada accepts the vendor's word that BSB raster chart viewing capability will be provided in accordance with TSOR 3.8.2.

All other terms and conditions remain unchanged.
