This Amendment 001 is being raised to answer a question from a potential bidder as follows:

QUESTION 1

I was reviewing the tender documentation and on page 11 it states, "There is no requirement for perimeter door work, only occupant rooms, store rooms and offices, the doors that access the building from the outside do not need to be touched." I would like to know if the perimeter doors already have some form of access control on them, and if so, what system is currently in place? If there is no existing access control system, are there any access control systems that are being considered, or need to be specified in the tender?

ANSWER 1

The perimeter doors **do not** have access control at the moment nor do we want access control in place.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED
