

Photo Appendix A

-
- 1) Install outside corners in alternating lased pattern with metal corner edge to match existing.

- 2) Within the siding replacement area, replace rotted wood elements surrounding windows. Stain to match existing.

-
- 3) Remove and reinstate bird spikes as required to complete work in dormer overhang areas.

-
- 4) Displace lighting protection as required to complete siding work. Re-secure to siding once work is complete.

-
- 5) Butt siding up to trim within enclosed area.

-
- 6) Remove and reinstate wall mounted light fixtures as required to complete siding work.

-
- 7) *Window jambs and adjoining wood members, around windows to be replaced if damaged, then repainted as outlined below:*
- a. Scrape and remove the existing paint.*
 - b. Use Opaque Weatherproofing All-In-One Wood type Stain/Paint & Sealer. Colour to match existing.*
